New washbasins made of refractory clay.

CENOTE

Lavabi appoggio

Lavabo d'appoggio tondo in argilla disponibile in due dimensioni, senza foro per rubinetto e con scarico libero. La finitura esterna è disponibile in terra naturale o in terra scura, entrambe con l'interno smaltato. La smaltatura interna può essere trasparente o bianco panna per la versione in terra naturale e trasparente o blu per la versione in terra scura. La finitura smaltata è sempre lucida. Il lavabo è completo di piletta con cassetta smaltata nella stessa finitura interna del lavabo. Il lavabo è realizzato interamente a mano, pertanto le eventuali differenze riscontrate sulla superficie o tra i vari articoli non devono essere considerate imperfezioni ma anzi, sono un segno di qualità.

Over countertop washbasins

Round clay countertop washbasin available in two sizes, without tap hole and with free drainage. The external finish is available in natural clay or dark clay, both with a glazed interior. The interior glaze can be transparent or off-white for the natural clay version and transparent or blue for the dark clay version. The glazed finish is always glossy. The washbasin is complete with a drain with a glazed cap in the same interior finish as the washbasin. The washbasin is entirely handmade, therefore any differences found on the surface or between various items should not be considered imperfections but rather, a sign of quality.

Aufsatzwaschbecken

Rundes Aufsatzwaschbecken aus Ton in zwei Größen, ohne Loch für die Armatur und ohne Überlauf. Die äußere Oberfläche ist in erdfarbenem oder dunklem Ton erhältlich, beide mit glasierlem Inneren. Die glasierte Innenfläche kann transparent oder weißcreme für die erdfarbene und transparent oder blau für die dunkle Tonversion sein. Die glasierte Oberfläche ist immer glänzend. Das Waschbecken ist komplett mit Ablaufgarnitur mit Stopfen in der gleichen Farbe der Innengläsur des Waschbeckens. Das Waschbecken ist vollständig von Hand hergestellt, daher sollten eventuelle Unregelmäßigkeiten in der Oberfläche oder zwischen den verschiedenen Artikeln nicht als Mängel betrachtet werden, sondern als Zeichen der Qualität.

Lavabos à poser

Lavabo à poser, rond, en argile disponible en deux dimensions, sans orifice pour robinet et à écoulement libre. La finition extérieure est disponible en terre naturelle ou en terre foncée, toutes les deux avec intérieur émaillé. L'émaillage intérieur peut être transparent ou blanc crème pour la version en terre naturelle et transparent ou bleu pour la version en terre foncée. La finition émaillée est toujours brillante. Le lavabo est équipé de bonde et bouchon émaillé de la même finition intérieure que le lavabo. Le lavabo est réalisé entièrement à la main, les éventuelles différences observées sur la surface ou entre les différents articles ne doivent pas être considérées comme des imperfections, mais plutôt comme un signe de qualité.

Lavabos de apoyo

Lavabo redondo de arcilla disponible en dos tamaños, sin orificio para grifo y con desagüe libre. El acabado exterior está disponible en tierra natural o en tierra oscura, ambas con el interior esmaltado. El esmalte interno puede ser transparente o crema para la versión en tierra natural y transparente o azul para la versión en tierra oscura. El acabado esmaltado siempre es brillante. El lavabo está completo con valvula de desagüe con tapa esmaltada en el mismo acabado interno del lavabo. El lavabo está hecho completamente a mano, por lo que las diferencias encontradas en la superficie o entre los diferentes artículos no deben ser consideradas imperfecciones sino una señal de calidad.

New washbasin.

ELL A COLONNA

Lavabi indipendenti

Lavabo rettangolare in solid surface bianco o in marmo bianco di Carrara, grigio Carrara, Carnic grey, Marquina black, dark Emperor or green Alpi marble supported by a column in powder-coated white or black steel. The basin is protected by a white Corian® aerator grid for the solid surface and white Carrara marble versions, or in Corian® Deep Caviar for the other marble versions. The washbasin is of the free drain type and includes a waste drain valve and mounting kit. The taps must be fitted to the wall or floor. El lavabó independiente en dos versiones: for wall or island installation. For the wall version, the column is equipped with a rear opening for the passage of the drain. For the island version, with floor drain, the MET0475 trap must be used.

Independent washbasins

Rectangular washbasin in white solid surface or in white Carrara, Carnic grey, Marquina black, dark Emperor or green Alpi marble supported by a column in powder-coated white or black steel. The basin is protected by a white Corian® aerator grid for the solid surface and white Carrara marble versions, or in Corian® Deep Caviar for the other marble versions. The washbasin is of the free drain type and includes a waste drain valve and mounting kit. The taps must be fitted to the wall or floor. El with column is available in two versions: for wall or island installation. For the wall version, the column is equipped with a rear opening for the passage of the drain. For the island version, with floor drain, the MET0475 trap must be used.

Unabhängige Waschbecken

Rechteckiges Waschbecken aus weißem Solid surface oder aus den Marmorarten Carrara weiß, Carrara-Grau, Marquina-Schwarz, Emperor-Dunkel oder Alpi-Grün, getragen von einer Säule aus weiß oder schwarz pulverbeschichtetem Stahl. Das Becken wird durch ein Corian®-Wasserstrahlbrecher-Gitter in weiß für die Versionen aus Solid surface und Carraramarmor oder in Deep Caviar für die anderen Marmorversionen geschützt. Das Waschbecken hat keinen Überlauf, Ablauf und Befestigungsmaterial sind im Lieferumfang enthalten. Für Wand- oder Standarmaturen geeignet. Bei der Wandversion ist die Säule mit einer rückseitigen Öffnung für das Abfließrohr ausgestattet. Bei der freistehenden Version mit Bodenablauf ist die Verwendung des Siphons MET0475 zwingend erforderlich.

Lavabos indépendants

Lavabo rectangolare en solid surface blanc ou en marbre blanc de Carrara, gris Carrara, noir Marquina, Emperor dark or vert Alpi, soutenu par une colonne en acier peint par poudre blanc ou noir. Le bassin est protégé par une grille brise-jet en Corian® blanche pour les versions en solid surface et marbre blanc de Carrara, ou en Corian® Deep Caviar pour les autres versions en marbre. Le lavabo est à écoulement libre, et comprend la bonde et le kit de fixation. La robinetterie doit être placée au mur ou au sol. El lavabó independiente en dos versiones: avec écoulement mural ou au sol. Dans la version avec écoulement mural, la colonne est équipée d'une ouverture arrière pour le passage du siphon. Dans la version avec écoulement au sol l'insertion du siphon MET0475 est obligatoire.

Lavabos independientes

Lavabo rectangular en solid surface blanco o en mármol blanco de Carrara, gris Carrara, negro Marquina, Emperor dark o verde Alpi, soportado por una columna en acero pintado blanco y negro. El lavabo está protegido por una rejilla aireadora de Corian® blanco para las versiones en solid surface y mármol blanco de Carrara o en Corian® Deep Caviar para las otras versiones en mármol. El lavabo es a descarga libre, incluye válvula de desague y kit de fijación. La grifería debe ser posicionada en la pared o al suelo. El de columna está disponible en dos versiones: con descarga a pared o a suelo. Para la versión con descarga a pared la columna está equipada con apertura trasera para el pasaje del sifón. Para la versión con descarga suelo es obligatorio utilizar el sifón MET0475.

Ell inox Washbasin

design Benedini Associati, Diego Cisi, Andrès Jost, 2022

[Back to washbasins...](#)

ELL INOX

Piani/lavabo

Il piano Ell Innox, realizzato in acciaio inox AISI304 da 1 mm nella finitura naturale spazzolato (Scotch Brite), è disponibile con lunghezza minima di cm 100 e massima di cm 260 ed è supportato da staffe fissate a parete.

Il bordo frontale è sempre rastrenato, mentre i bordi laterali possono essere o rastrenati oppure dritti per un miglior posizionamento in angolo o in nicchia.

Gli invasi, da 60 o 120 cm, sono completi di griglia in Corian® Deep Anthracite e sono liberamente posizionabili su tutta la lunghezza del piano rispettando le distanze dai bordi e quella tra gli invasi (pag. 5.30). L'invaso da 120 cm prevede sempre 2 griglie.

L'invaso non è completo di piletta. Utilizza piletta .MET0569 con sifone a scomparsa .PLA0456.

Ell Innox prevede solo l'utilizzo di rubinetteria a parete.

È disponibile una struttura laterale aggiuntiva, non portante, in legno con funzione di porta salviette "X" AMET1877 (cap. 13)

Washbasin/ countertops

The Ell Innox top, made of 1 mm thick AISI304 stainless steel in a natural brushed finish (Scotch Brite), is available in lengths ranging from 100 cm up to 260 cm, and is supported by brackets fixed to the wall.

The front edge is always tapered, whereas the side edges can be either tapered or straight for better cornering or niche positioning.

The 60 or 120 cm basins are complete with a Corian® Deep Anthracite grid and can be freely positioned along the entire length of the top, respecting the distances from the edges and the distance between the basins (page 5.30). The 120 cm basin always includes 2 grids.

The basin is not complete with waste drain valve. With MET0569 waste drain valve with PLA0456 concealed trap.

Ell Innox can only be used with wall-mounted taps.

An additional, non-load-bearing side wooden structure is available to be used as an AMET1877 "X" towel holder (chap. 13)

Waschtischplatten

Die Platte Ell Innox aus 1 mm Edelstahl AISI304 in natürlich gebürsteter Ausführung (Scotch Brite) ist mit einer Mindestlänge von 100 cm und einer Höchstlänge von 260 cm erhältlich und wird von an der Wand befestigten Halterungen getragen.

Die Vorderkante ist immer abgeschrägt, während die Seitenkanten entweder abgeschrägt oder gerade sein können, um ein besseres Einpassen in eine Ecke oder Nische zu ermöglichen.

Die 60 oder 120 cm großen Becken sind mit einem Corian® Deep Anthracite-Gitter ausgestattet und können über die gesamte Länge der Platte frei positioniert werden, wobei die Abstände zu den Rändern und zwischen den Becken eingehalten werden müssen (Seite 5.30). Das 120 cm Becken hat immer 2 Gitter.

Das Becken wird nicht / wird komplett mit Ablauf geliefert. Es wird der Ablauf MET0569 mit verdecktem Siphon PLA0456 verwendet.

Ell Innox sieht nur die Verwendung von Wandarmaturen vor.

Eine zusätzliche nicht tragende Seitenstruktur in Holz ist mit der Funktion Handtuchhalter "X" AMET1877 erhältlich (Kap. 13)

Piani/lavabo

Le plan Ell Innox, réalisé en acier inoxydable AISI304 d'1 mm, avec finitions naturelles brossées (Scotch Brite), est disponible dans les longueurs minimales de 100 cm et maximale de 260 cm et est soutenu par des supports fixés au mur.

Le bord avant est toujours fuselé, tandis que les bords latéraux peuvent être soit fuselés soit droits, pour les placer plus facilement dans un angle ou une niche.

Les vasques, de 60 ou 120 cm, comportent une grille en Corian® Deep Anthracite et peuvent être placées librement sur toute la longueur du plan, dans le respect des distances des bords et entre les vasques (page 5.30). La vasque de 120 cm est toujours fournie avec 2 grilles.

La bonde de la vasque n'est pas comprise. La bonde MET0569 avec siphon à encaissement PLA0456 sont à joindre.

Ell Innox prévoit uniquement l'utilisation de robinetterie murale.

Une structure latérale supplémentaire non portante en bois est disponible, servant de porte-serviette "X" AMET1877 (voir chap. 13)

Encimeras/lavabo

La encimera Ell Innox, realizada en acero inox AISI304 de 1 mm en el acabado cepillado (Scotch Brite), está disponible con longitud mínima de 100 cm y máxima de 260 cm y está soportado por estribos fijados en la pared.

El borde frontal siempre es cóncavo, mientras que los bordes laterales pueden ser cóncavos o rectos para un mejor posicionamiento en ángulo o en nicho.

Los lavabos intramuros, de 60 o 120 cm, poseen una rejilla en Corian® Deep Anthracite y pueden posicionarse libremente en toda la longitud de la encimera respetando las distancias desde los bordes y la distancia entre los espacios intramuros (pág. 5.30). El lavabo intramuros de 120 cm prevé siempre 2 rejillas.

El lavabo no tiene desagüe. Utiliza desagüe .MET0569 con sifón empotrado .PLA0456.

Ell Innox prevé solo el uso de grifería de pared.

Está disponible una estructura lateral adicional, no portante, de madera con función de porta toallas "X" AMET1877 (cap. 13)

L min 1.000 mm (39" 3/8)
max 2600 mm (102" 23/64)

Face à Face Washbasin

design Jean Nouvel Design, 2022

[Back to washbasins...](#)

Family of washbasins made with marble slabs.

FACE À FACE

Lavabi indipendenti

Famiglia di lavabi realizzati con lastre di marmo. Multiple versioni: a parete, a colonna, con ripiani o con porta salviette.

I lavabi sono realizzati in marmo bianco di Carrara, marmo grigio carnicco o marmo nero Marquina, con scarico libero, compresi kit di fissaggio.

Le aste porta salviette sono verniciate in bianco per la finitura bianco di Carrara, in nero per le altre finiture.

I lavabi non necessitano di piletta, per la versione a parete è consigliato l'utilizzo di sifone a bottiglia (MET0409) oppure sifone ad incasso (PLA0456+AKIT0731), per la versione a colonna è consigliato il sifone .MET0519.

Il lavabo può essere fornito anche in pietre o marmi a richiesta del cliente con costo da preventivare.

Independent washbasins

Family of washbasins made with marble slabs. Multiple versions: wall-mounted, column, with shelves or with towel holder. The washbasins are made of white Carrara marble, grey Carrara marble or black Marquina marble, with free drainage, including fixing kits.

The towel holder rods are painted white for the white Carrara finish, black for the other finishes.

The washbasin does not need a waste, for the wall version, the use of a bottle trap (MET0409) or a recessed trap (PLA0456+AKIT0731) is recommended, for the column version, the use of the .MET0519 siphon is recommended.

The washbasin can be delivered also in stone or marble types on demand, price to be calculated.

Unabhängige Waschbecken

Waschbeckenfamilie aus Marmorplatten. Mehrere Versionen: für Wandmontage, mit Standfuß, mit Ablage oder Handtuchhalter. Die Waschbecken werden aus weißem Carrara-Marmor, grauem Carrara-Marmor oder schwarzem Marquina-Marmor hergestellt, ohne Überlauf, inklusive Befestigungskit.

Die Handtuchhalter sind für die Ausführung in weißem Carrara-Marmor weiß und für die anderen Ausführungen schwarz lackiert.

Die Waschbecken benötigen keinen Ablauf, für die wandmontierte Variante empfehlen wir die Verwendung eines Flaschensiphons (MET0409) oder des Einbausiphons (PLA0456+AKIT0731). Für die Variante mit Säule den Siphon .MET0519 verwenden.

Das Waschbecken ist auch in Stein- oder Marmorarten nach Wunsch lieferbar, Preis auf Anfrage.

Lavabos indépendants

Famille de lavabos réalisée avec des plaques de marbre. Varias versiones: mural, colonne, avec étagères ou avec porte-serviettes. Les lavabos sont réalisés en marbre blanc de Carrare, marbre gris carrique ou marbre noir Marquina, à écoulement libre, kit de fixation inclus.

Les barres porte-serviettes sont peintes en blanc pour la finition blanche de Carrare, en noir pour les autres finitions.

Les lavabos ne nécessitent pas de bonde, pour la version murale il est conseillé de utiliser le siphon à bouteille (MET0409) ou le siphon encastré (PLA0456+AKIT0731), pour la version à colonne il est conseillé le siphon .MET0519.

Le lavabo peut être fourni aussi en pierres ou marbres à la demande du client avec devis à établir.

Lavabos independientes

Familia de lavabos hechos con láminas de mármol. Varias versiones: de pared, columna, con estantes o con toallero.

Los lavabos están hechos de mármol blanco de Carrara, mármol gris Carrico o mármol negro Marquina, con desagüe libre, incluidos los kits de fijación.

Las barras porta toallas están pintadas en blanco para el acabado blanco de Carrara, en negro para los otros acabados.

El lavabo se puede producir también en piedra o mármol bajo petición del cliente previo presupuesto.

Litorale Washbasin

design Benedini Associati, 2021

[Back to washbasins...](#)

Litorale - Wall mounted and rested on cabinets design Benedini Associati

[Back to washbasins...](#)

LITORALE

Piani/lavabo

Piano/lavabo realizzato in solid surface bianco, a falda unica inclinata verso lo scarico, posto in prossimità della parete e non visibile, spessore 60 mm.

La rubinetteria può essere installata sia sul piano che a parete. Se è previsto l'utilizzo di due rubinetti, è obbligatorio l'utilizzo del piano/lavabo con due scarichi.

Sul piano possono essere collocati liberamente elementi sagomati che creano piani d'appoggio.

Codifica

Per individuare correttamente il piano desiderato, completare il codice inserendo nelle caselle l'opzione possibile seguendo l'ordine indicato (a, b, c, ecc.).

a. tipologia piano

- con uno scarico
- con due scarichi

b. foro per rubinetteria su piano o lavabo

- OR: nessun foro
 1R: foro per monocomando su piano
 3R: fori per gruppo a 3 fori su piano
 F: foro con dimensioni speciali per rubinetto (prezzo a richiesta)

c. lunghezza del piano in mm

- 0800 (mm 800),
 1000 (mm 1000),
 1200 (mm 1200)...

Washbasin/ countertops

Top/washbasin in white solid surface, with single inclination towards the drain, positioned near the wall and not visible, thickness 60 mm.

The taps can be wall- or top-mounted. If used with two taps, the top/washbasin must have two drains.

The top can be freely fitted with moulded elements that create support surfaces.

Codification

To order the countertop correctly, complete the order code inserting the desired option in the indicated sequence (a,b,c etc.).

a. type of countertop

- with one drain
- with two drains

b. tap hole on countertop or washbasin

- OR: no hole
 1R: hole for one hole mixer on countertop
 3R: holes for 3 hole tap set on countertop
 F: hole with special dimensions for tap (price on demand)

c. length of the top in mm

- 0800 (mm 800),
 1000 (mm 1000),
 1200 (mm 1200)...

Waschtischplatten

Waschtischplatte aus weissem solid surface mit Neigung Richtung Abfluss, der in der Nähe der Wand positioniert und unsichtbar ist. Dicke 60 mm.

Armaturen können auf der Platte oder an der Wand installiert werden. Sind 2 Armaturen geplant, so muss die Variante mit 2 Abflüssen verwendet werden.

Auf der Waschtischplatte können profilierte Elemente, die als Ablageflächen dienen, beliebig positioniert werden

Kodifizierung

Zur korrekten Bestellung der Ablage den oben aufgeführten Bestellcode durch Einsetzen der gewünschten Option in der angegebenen Reihenfolge (a,b,c etc.) vervollständigen.

a. Typologie Ablage

- von Ein Ablauf
- von Zwei Abflüsse

b. Armaturenloch auf Ablage oder Waschbecken

- 0: kein Loch
 1R: Loch für Einhandmischer auf Platte
 3R: Löcher für 3-Lochmischer auf Platte
 F: Ausschnitt mit Sondermaß für Armatur (Preis auf Anfrage)

c. Länge der Platte in mm

- 0800 (mm 800),
 1000 (mm 1000),
 1200 (mm 1200)...

Plans/lavabos

Piano/lavabo réalisé en solid surface blanc, avec un seul pan incliné vers l'évacuation, placé près du mur et non visible, épaisseur 60 mm.

Les robinets peuvent être installés à la fois sur le plan que sur le mur. Si l'utilisation de deux robinets est prévue, l'utilisation du plan/lavabo avec deux évacuations est obligatoire.

Sur le plan, on peut placer librement des éléments façonnés qui créent des plans d'appui.

Codification

Pour déterminer correctement le lavabo à commander, compléter le code en indiquant dans les cases l'option possible en suivant l'ordre indiqué (a,b,c,etc.).

a. typologie plan

- avec un écoulement
- avec deux écoulements

b. trou pour robinetterie sur plan ou lavabo

- 0: aucun trou
 1R: trou pour monocommande sur plan
 3R: trous pour groupes à 3 trous sur plan
 F: trou avec dimensions spéciales pour robinet (prix sur demande)

c. longueur du plan en mm

- 0800 (mm 800),
 1000 (mm 1000),
 1200 (mm 1200)...

Encimeras/lavabo

Encimera/lavabo realizado en solid surface blanco, de agujero de descarga único inclinado hacia el desagüe, ubicado cerca de la pared y no visible, espesor de 60 mm.

La grifería se puede instalar tanto sobre la encimera que en la pared. Si está previsto el uso de dos grifos, es obligatorio utilizar la encimera/lavabo con dos desagües.

En la encimera se puede colocar libremente elementos moldeados que crean planos de apoyo.

Codificación

Para pedir correctamente la encimera deseada, completar el código insertando en las casillas la opción posible siguiendo el orden que se indica (a, b, c, etc.).

a. tipologia de encimera

- con una descarga
- con dos descargas

b. orificio para grifería en la encimera o en el

- 0: ningún orificio
 1R: orificio para monomando sobre encimera
 3R: orificios para grifería bimando sobre encimera
 F: perforación con dimensiones especiales para grifo (precio a petición)

c. longitud de la encimera en mm

- 0800 (mm 800),
 1000 (mm 1000),
 1200 (mm 1200)...

Raso Washbasin

design Benedini Associati, 2021

[Back to washbasins...](#)

New item: ACER0385.

RASO

Lavabi appoggio

Lavabo d'appoggio rettangolare in solid surface bianco realizzato da termoformatura, in marmo bianco di Carrara, marmo grigio carnicio, marmo nero Marquina, marmo verde Alpi, o marmo Emperador dark o Petit granit, a scarico libero e senza foro per rubinetto.

Il lavabo può essere fornito in marmo Calacatta Vagli e Calacatta viola o con pietre o marmi a richiesta del cliente con costo da preventivare.

Il lavabo Raso è disponibile anche sottopiano integrato nel piano Evo 21 in solid surface con spessore 12 mm.

Over countertop washbasins

Rectangular countertop washbasin in white solid surface made by thermoforming, in white Carrara marble, grey Carnic marble, black Marquina marble, green Alpi marble, or Emperador dark or Petit granit marble, with free drainage and without tap hole.

The basin includes the waste fitting with plug in a matching finish.

The Raso washbasin is also available under the counter integrated into the Evo 21 solid surface top with a thickness of 12 mm.

Aufsatzwaschbecken

Rechteckiges Aufsatzwaschbecken aus weißem solid surface thermoformt, aus weißem Carrara-Marmor, grauem Carnico-Marmor, schwarzem Marquina-Marmor, grünem Alpi-Marmor oder Emperador-Dunkel- oder Petit-Granit-Marmor, mit freiem Abfluss und ohne Hahnloch.

Das Waschbecken ist aus Marmor Calacatta Vagli und Calacatta Viola erhältlich. Dieses kann auch aus anderen Verschiedenen Steinen nach Anfrage hergestellt werden. Preis nach Anfrage.

Das Waschbecken Raso ist auch als Unterbauwaschbecken und schon in der Evo 21 Platte aus solid surface integriert erhältlich. Stärke 12 mm

Lavabos à poser

Lavabo à poser rectangulaire en solid surface blanc produit par thermoformage, en marbre blanc de Carrara, marbre gris carnicio, marbre noir Marquina, marbre vert Alpi ou marbre Emperador dark ou Petit granit, à écoulement libre et sans trou robinet.

Le lavabo est équipé d'une bonde avec bouchon dans la même finition que le lavabo.

Le lavabo Raso est également disponible comme lavabo sous le plan intégré au plan en solid surface Evo 21 d'une épaisseur de 12 mm.

Lavabos de apoyo

Lavabo de apoyo rectangular en solid surface blanco termofornado, en mármol blanco de Carrara, mármol negro Marquina, mármol verde Alpi, mármol Emperador dark o en Petit granit, a descarga libre y sin agujero para grifería.

El lavabo comprende la valvula de desague con casquete en el mismo acabado del lavabo.

El lavabo se puede producir en mármol Calacatta Vagli y Calacatta violeta o en piedras o mármoles bajo petición del cliente previo presupuesto.

El lavabo Raso es también disponible en versión bajo encimera, integrado en la encimera Evo 21 en solid surface con espesor 12 mm.

New product.

[Back to bathtubs...](#)

New product.

FACE À FACE

Vasche

Vasca realizzata con lastre di marmo disponibili in bianco di Carrara, grigio carnicio o nero Marquina, senza fori per tubetterie; questa può essere collocata a parete o a terra.
Face à face è completa di piletta sifonata cromata con troppo pieno integrato MET0722S.
La vasca può essere fornita anche in pietre o marmi a richiesta del cliente con costo da preventivare.

Per un'installazione più agevole, si suggerisce l'utilizzo del pozzetto per vasca AKITPZVAS (vedi pag. 11.14).

Bathtubs

Bathtub made of marble slabs available in Carrara white, grey Carnic, or black Marquina, without holes for plumbing fixtures; it can be placed on the wall or on the ground.
Face à face are fitted with a chromed waste with siphon and with overflow. MET0722S.
The bathtub can be delivered also in stone or marble types, on demand, price to be calculated.

For an easier installation of the bathtubs we recommend to use the template for the positioning of the waste trap AKITPZVAS (see p. 11.14).

Badewannen

Badewanne aus Marmorplatten in weißen Carrara, Grigio Carnicio oder schwarzem Marquina Marmor, ohne Löcher für die Armatur; diese kann an der Wand oder auf dem Boden platziert werden.
Face à face ist komplett mit chromiertem Ablauf mit integriertem Überlauf MET0722S.
Auf Kundenwunsch kann die Wanne auch aus Stein oder Marmor hergestellt sein. Preis nach Kostenvorschlag.

Um die Montage der Badewannen zu erleichtern, wird die Verwendung der Schablone zur Verlegung des Abflusses AKITPZVAS empfohlen (siehe S. 11.14).

Baignoires

Baignoire fabriquée avec des plaques de marbre disponibles en blanc de Carrara, gris carnicio ou noir Marquina, sans trous pour la robinetterie; celle-ci peut être installée au mur ou au sol.
Face à face est équipée de bonde chromée avec siphon et trop plein intégré MET0722S.
La baignoire peut être produite aussi en pierre ou marbres à la demande du client avec coût à établir avec devis.

Pour faciliter le montage, on conseille de utiliser le posad pour baignoire AKITPZVAS (voir pag. 11.14).

Bañeras

Bañera hecha con laminas de mármol disponibles en blanco de Carrara, gris carnicio o negro Marquina, sin agujeros para la grifería; la grifería se puede colocar a pared o a suelo.
Face à face se completa con válvula de desagüe con sifón cromada, con rebosadero integrado. MET0722S.
La bañera puede suministrarse también en piedras o mármoles según la demanda del cliente, con coste a presupuestar.

Para una instalación más fácil, aconsejamos el uso del sumidero para bañera AKITPZVAS (ver pag. 11.14).

Open Air Showers

[Back to showers...](#)

Open Air - Wall-mounted shower

design Benedini Associati

A little over a year after its debut, the family is enriched with a **new wall-mounted version** for up-and-down use completed with a convenient **storage tray**.

Open Air is a family of showers with a **black anodized aluminum support** that is mobile, light and almost irreverent. The water supply elements are made of POM, a plastic material, with a black finish.

The flexible hose, made of black PVC **features a quick coupling for the garden**. The shower is equipped with **flow regulation only**.

Open Air - Freestanding shower

design Benedini Associati

Selected by ADI DESIGN INDEX

The Open Air shower enters in the **ADI Design Index 2021**, section "Design for living", with the iconic pieces that express the concept "**outdoor within**" made by Agape: projects that extends themselves from the bathroom space and **go beyond the line** between inside and outside, showing new functionality and new aesthetic qualities.

Soffioni e integrazioni per rubinetteria

OPEN AIR

Doccia da terra con supporto in alluminio anodizzato nero e base in Cementoskín® (cemento colorato in pasta) grigio scuro; gli elementi di adduzione dell'acqua sono realizzati in POM, materiale plastico, con finitura nera. Il tubo flessibile, in PVC nero, è completo di attacco rapido per giardino. La doccia è dotata di sola regolazione di flusso.

Shower heads and tapware accessories

Freestanding shower with support in black anodized aluminium and basement in dark grey Cementoskín® (coloured concrete paste). Water adduction elements are realized in POM, plastic material in black finish. The flexible hose, in black PVC, is completed with rapid garden connection. The shower only foresees the flow regulation.

Kopfbrausen und Armaturen-Accessoires

Dusche mit Halterung aus schwarz eloxiertem Aluminium und Fuß aus dunkelgrauem Cementoskín® (farbiger Zement in Pastenform). Die Elemente zur Zuleitung des Wassers sind aus POM, einem Kunststoff, in Ausführung schwarz. Der Flexschlauch aus schwarzem PVC besitzt einen Schnellverschluss für Gartenschläuche. Die Dusche besitzt nur einen Durchflussregler, keine Temperaturregelung.

Douches de tête et intégrations pour robinetterie

Douche au sol équipée de support en aluminium anodisé noir et base en Cementoskín® (ciment coloré en pâte) gris foncé; les éléments d'adduction de l'eau sont réalisés en POM, matériel plastique, avec finition noire. Le tuyau flexible, en PVC noir, est équipé de fixation rapide pour jardin. La douche est équipée seulement de régulation de flux.

Alcachofas y accesorios para grifería

Ducha a suelo con soporte en aluminio anodizado negro y base en Cementoskín® (cemento de color en pasta) gris oscuro; los elementos de aducción del agua están realizados en POM, material plástico, en acabado negro. El tubo flexible, en PVC negro, está equipado con conexión rápida para jardín. La ducha está equipada solo con regulación de flujo.

Taps and shower heads

Limón Taps

design Patricia Urquiola, 2021

[Back to taps...](#)

Limón: Grafting geometries.

Meeting and mating with **its own circular section**, just like in the age-old concept of agricultural grafting, has transformed the seemingly elemental geometries of Limón in something completely different. A new and fresh breed of taps that communicate its structure and intended use with unusual **honesty and clarity**.

Limón is an other episode in Patricia Urquiola's research path in **disassembling and then re-composing geometries** with sculptural qualities that started with the Lariana column washbasin followed by the Rigo system.

Limón.

Traditional, double lever and thermostatic controls.

Limón.
A great variety of finishes.

LIMÓN

Rubinetti

Rubinetteria in ottone caratterizzata dalla maniglia, creata dall'incontro e dall'unione con la propria sezione circolare, che trasforma la geometrie apparentemente elementari di Limón in qualcosa di completamente diverso.

I gruppi doccia e i gruppi vasca sono da completare con doccette, tubi flessibili e soffioni (vedi capitolo 19).

La rubinetteria non è completa di piletta che deve essere ordinata a parte.

Tutti i gruppi che prevedono elementi da incassare nella parete, sono presentati nelle due componenti: parte esterna (.ELIM...) e parte da incassare (.ELIX...).

Per l'esposizione dei gruppi a parete o ad incasso è possibile utilizzare la sola parte esterna completandola con l'apposito kit per esposizione.

Finiture standard:

- cromo
- brunito spazzolato
- ottone naturale spazzolato
- nero opaco (RAL9005)

Finiture a richiesta:

- bianco opaco (RAL9003)
- ottone naturale lucido
- altre finiture personalizzate su base ottone naturale

Lotto minimo 10 pezzi per finitura.
Maggiorazione 10% sul costo della finitura nero opaco.
Tempo di produzione 6 settimane dalla data dell'ordine.

Finiture a richiesta:

- copper PVD*
- Gun metal PVD*
- nichel spazzolato

Lotto minimo 5 pezzi per finitura.
Maggiorazione 50% sul costo della finitura cromo.
Tempo di produzione 10/12 settimane dalla data dell'ordine.

(* Physical Vapor Deposition)

Taps

Brass taps characterized by a handle created by the encounter and union with its own circular section which transforms the apparently elementary geometries of Limón into something completely different.

Shower and bathtub tap sets must be completed with handheld showers, flexible hoses and shower heads (see section 19).

Tap sets are supplied without waste, which must be ordered separately.

All units foresee built-in parts in its two components: external part (.ELIM...) and recessed part (.ELIX...). For display installations of wall mounted or built-in tap sets, it is possible to use only the external part with the kit specifically made for this purpose.

Standard finishes:

- chrome
- burnished brushed
- natural brushed brass
- matt black (RAL9005) finish

Customized finishes:

- matt white (RAL9003) finish
- natural polished brass
- other customized natural brass finishes

Minimum batch 10 pieces for finish.
Surcharge 10% of the price of the matt black finish.
Production time of 6 weeks from order date.

Customized finishes:

- copper PVD
- Gun metal PVD
- nickel brushed

Minimum batch 5 pieces for finish.
Surcharge 50% of the price of the chrome finish.
Production time of 10/12 weeks from order date.

(* Physical Vapor Deposition)

Armaturen

Messingarmaturen zeichnen sich durch den Griff aus, der durch die Begegnung und Vereinigung mit ihrem eigenen Kreisabschnitt entsteht, der die scheinbar elementaren Geometrien von Limón in etwas anderes verwandelt.

Die Dusch- und Badewannenarmaturen sind mit Handbrausen, Handbrausenschläuchen und Kopfbrausen zu kompletieren (siehe Kapitel 19).

Armaturen ohne Ablaufventile, letztere sind getrennt zu bestellen.

Alle Unterputzarmaturen können in zwei Komponenten bestellt werden: Deckteil (.EMIX...) und Unterputzteil (.ILIX...). Für die Montage von Wand- oder Unterputzarmaturen in Ausstellungen ist es möglich, nur das mit dem entsprechenden Kit zu ergänzende Deckteil zu verwenden.

Standard Ausführungen:

- Chrom
- Brüniert gebürstet
- Messing Natur gebürstet
- Schwarz matt (RAL 9005)

Ausführungen nach Anfrage:

- Weiß matt (RAL 9003)
- Messing Natur glänzend
- Andere Ausführungen auf Basis von Naturmessing

Mindestbestellmenge 10 Stück pro Ausführung.
Aufpreis von 10% auf dem Preis der Oberfläche Schwarz matt.

Lieferzeit 6 Wochen ab Bestelldatum

Ausführung nach Anfrage:

- Copper PVD
- Gun Metal PVD
- Nickel gebürstet

Mindestbestellmenge 5 Stücke pro Ausführung.
Aufpreis von 50% auf dem Preis der Oberfläche Chrom.
Lieferzeit 10 bis 12 Wochen ab Bestelldatum.

(* Physical Vapor Deposition)

Robinetterie

Robinetterie en laiton caractérisée par la poignée, créée par la rencontre et l'union avec sa propre section circulaire, qui transforme les géométries apparemment élémentaires de Limón en quelque chose de complètement différent.

Les groupes douche et les groupes baignoire doivent être complétés de douches de tête, tubes flexibles et douchettes (voir le chapitre 19).

La robinetterie n'est pas choisie de bonde qui doit être commandée séparément.

Tous les groupes qui prévoient éléments à encaster dans le mur, deux composantes: partie extérieure (.ELIM...) et partie à encaster (.ILIX...).

Pour l'exposition des groupes muraux ou à encaster, on peut utiliser la partie externe seule avec le kit pour exposition prévu à cet effet.

Finitions standard:

- chrome
- brunie brossée
- laiton naturel brossé
- noir opaque (RAL9005)

Finitions personnalisées:

- blanc opaque (RAL9003),
- laiton naturel poli
- autres finitions personnalisées sur base en laiton naturel

Lot minimum 10 pièces pour finition.
Majoration 10% sur le coût de la finition noir opaque.
Délai de production 6 semaines de la date de la commande.

Finitions personnalisées:

- copper PVD
- Gun metal PVD
- nickel brossée

Lot minimum 5 pièces pour finition.
Majoration 50% sur le coût de la finition chrome.
Délai de production 10/12 semaines de la date de la commande.

(* Physical Vapor Deposition)

Grifería

Grifos en latón caracterizada por su palanca, creada por el encuentro y unión con su propia sección circular, que transforma las geometrías aparentemente elementales de Limón en algo completamente diferente.

Las griferías para ducha y bañera deben completarse con duchadores, tubos flexibles y alchachos (ver capítulo 19).

La grifería se suministra sin válvula de desagüe que debe pedirse aparte.

Todas las griferías con elementos a empotrar se pueden ordenar en dos componentes: parte externa (.ELIM...) y parte empotrada (.ILIX...).

Para la exposición de las griferías a pared o empotradas, es posible usar sólo la parte exterior completándola con el correspondiente kit para exposición.

Acabados estándar:

- cromo
- brunito y cepillado
- latón natural cepillado
- negro mate (RAL9005)

Acabados a petición:

- blanco mate (RAL9003)
- latón natural pulido
- otros acabados personalizados sobre una base de latón natural

Lote mínimo de 10 piezas por acabado.
Recargo del 10% sobre el precio del acabado negro mate.
Tiempo de producción de 6 semanas a partir de la fecha de pedido.

Acabados a petición:

- copper PVD
- Gun metal PVD
- níquel cepillado

Lote mínimo de 5 piezas por acabado.
Recargo del 50% sobre el precio del acabado cromado.
Tiempo de producción de 10/12 semanas a partir de la fecha de pedido.

Memory Mix Taps

design Benedini Associati, 2021

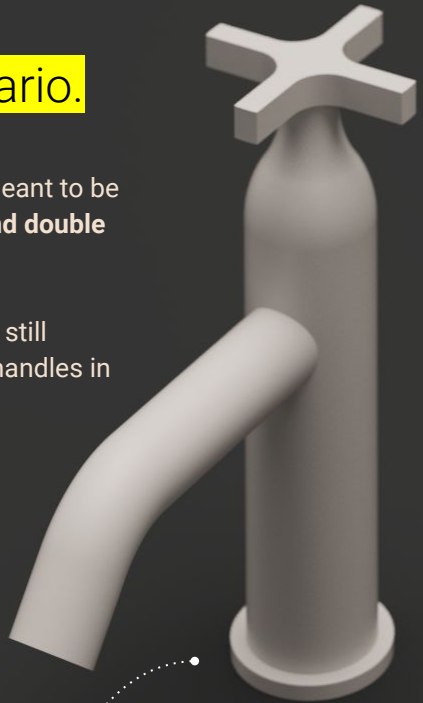

[Back to taps...](#)

A new handle: A new usage scenario.

The new Memory Mix series is meant to be used with **conventional single and double lever mixers**.

The gradual flow control mixer is still available with the cross shaped handles in the Memory series.

Memory gradual
flow control mixer

Family feeling: derivative design.

The new lever **derives its shape** directly **from the iconic cross-shaped** handle of the Memory series.

The new single lever is twice as long as one arm of the “conventional” Memory handle. Its width had been adjusted and slightly widened to be **ergonomically coherent** with the new usage pattern.

Memory Mix: for Washbasin and Bidet

The elements allow to cover every functional need in the bathroom: **Washbasins and Bidet.**

Available the new cork cable finish.

BUCATINI

Accessori

Accessori realizzati con un cavetto in acciaio ricoperto da materiale plastico o da cavetto rivestito in sughero tostato che ha anche funzione di supporto per i contenitori in ceramica.

Kit di fissaggio compresi. Il fissaggio degli accessori a parete si realizza mediante viti e tasselli ad espansione.

Quantitativo minimo d'ordine 8 pezzi per qualsiasi combinazione di articolo (specchi esclusi); per quantità inferiori supplemento del 20%.

Accessories

Accessories made from steel cables sheathed with plastic or from cables sheathed with heat treated cork, which also serves as support for the ceramic containers.

Complete with fixing kit. Wall mounted accessories are fixed by means of screws and wall plugs.

Minimum order quantity: 8 pieces for any combination items (excluding mirrors). For smaller quantities, add 20% surcharge.

Accessoires

Zubehör aus einem mit Kunststoff überzogenem Stahlkabel oder einem mit gebranntem Kork überzogenem Kabel, das auch als Halterung für Keramikbehälter dient.

Kit zur Befestigung inbegriffen. Die Wandaccessoires werden mit Schrauben und Expansionsdübeln befestigt.

Mindestbestellmenge 8 Stück für jede beliebige Kombination von Artikeln (ohne Spiegel); für geringere Mengen Aufpreis von 20%.

Accessoires

Accessoires comprenant un câble en acier revêtu de plastique ou un câble revêtu de liège expansé, servant également de supports pour les récipients en céramique.

Kit de fixation inclus. Les accessoires muraux sont fixés à la paroi avec des vis et des chevilles expansives.

Commande minimum: 8 unités pour n'importe quelle combinaison de produit (miroirs exclus); pour des quantités inférieures un supplément de 20% sera appliqué.

Accesorios

Accesorios fabricados con un cable de acero cubierto con material plástico o de un cable revestido con corcho tostado, que también cumple la función de soporte para los contenedores de cerámica.

Kit de fijación incluido. La fijación de los accesorios a la pared se realiza con tornillos y tacos de expansión.

Cantidad mínima por pedido: 8 unidades para cualquier combinación de artículo (espejos no incluidos); cantidades inferiores tendrán un recargo del 20%.

Rendez-vous Extras

[Back to extras...](#)

Rendez-vous - Benches

design Marco Carini

Three **day-bed benches** in **different heights** can be used individually or stacked as desired, creating a space to sit, have a conversation, or stretch out and relax.

The surface consists of **hand-woven** ropes of cork, with a technical metal core. **The supports and frame are made of recycled aluminum tubing** painted in a warm brick-red color.

Vis-à-vis Extras

design Marco Carini, 2022

[Back to extras...](#)

Vis-à-vis - Seat

design Marco Carini

Vis-à-vis is a light and maneuverable **stool** made entirely of **natural or heat-treated cork**.

It can also be used as a small side table. Removing a slice from the cylindrical body creates a curve that has the same radius as the base.

That means one piece can be **linked to another** indefinitely, even creating a circular motion. That same curve also allows **two people to sit** comfortably facing each other on two stools.

Like Rendez-vous, the Vis-à-vis stool too has been designed to be water-resistant for an extremely **wide range of uses**.

VIS-À-VIS

13

Complementi

Sgabello interamente in sughero naturale o tostato utilizzabile anche come piccolo piano da appoggio. Data la particolare forma ogni elemento è accostabile all'altro e permette di comporre figure lineari o curve. Lo sgabello Vis-à-vis è pensato per funzionare a contatto con l'acqua per una gamma di utilizzi estremamente ampia.

Extras

Stool manufactured entirely in natural or heat treated cork that can also be used as a small support surface. Given its particular shape, each element can be combined with the others thus giving shape to linear or curved figures. The Vis-à-vis stool is designed to be water resistant for an extremely wide range of uses.

Zubehör

Hocker komplett aus natürlichem oder gebranntem Kork, der auch als kleine Ablagefläche verwendet werden kann. Aufgrund ihrer besonderen Form können die Elemente nebeneinander platziert und lineare oder gekrümmte Figuren komponiert werden. Der Vis-à-vis-Hocker ist für den Kontakt mit Wasser für ein extrem breites Anwendungsspektrum konzipiert.

Compléments

Tabouret entièrement en liège naturel ou expansé, servant également de petit plan d'appui. Grâce à leur forme particulière, chaque élément est encastrable l'un avec l'autre, ce qui permet de composer des figures linéaires ou courbes. Le tabouret Vis-à-vis est conçu pour être placé au contact de l'eau et sa gamme d'utilisations est très vaste.

Complementos

Taburete íntegramente en corcho natural o tostado que también se puede utilizar como una pequeña superficie de apoyo. Dada la forma particular, cada elemento se puede colocar junto al otro y permite componer figuras lineales o curvas. El taburete Vis-à-vis está diseñado para estar en contacto con el agua para una gama extremadamente amplia de usos.

Specchi

Faro ist eine Familie von spechli
förmig hängend zu collocare a
parete.

Gli specchi sono disponibili
in due diametri: da 60 o da
90 cm.

L'elemento di sostegno dello
specchio che funge anche
da lampada con luce LED,
è realizzato in policarbonato
trattato con estermisil in
alluminio anodizzato nero.

Lo specchio è sorretto da
cavo di acciaio (H 2,00 m)
ed è predisposto per restare
distanziato dalla parete (10
cm) e l'alimentazione necessaria
nel rosone a soffitto.

Kit di fissaggio compreso.
Lo specchio è fissato a
soffitto con viti e tasselli ad
espansione.

Mirrors

Faro is a range of suspended
round mirrors for wall
installation.

The mirrors are available in
two diameters: 60 or 90 cm.

The support element of the
mirror, which also serves as a
lamp with LED light, is made
of satin-finished polycarbonate
with black anodised aluminium
ends.

The mirror is supported by a
steel cable (H 2,00 m) and is
designed to stay away from
the wall (by 10 cm); the power
pack is hidden in the ceiling
rosette.

Fixing kit included.
The mirror is fixed to the
ceiling by means of expansion
screws and dowels.

Spiegel

Faro ist eine Familie von
hängenden runden Spiegel,
die an der Wand angebracht
werden können.

Der Spiegel sind in zwei
Durchmessern erhältlich: 60
oder 90 cm.

Das Trägerelement des
Spiegels, der auch als Lampe
mit LED-Licht fungiert,
besteht aus satiniertem
Polycarbonat mit Extrimitäten
aus schwarz eloxiertem
Aluminium.

Der Spiegel wird von einem
Stahlfad (H 2,00 m) getragen
und ist so konzipiert, dass er
einen Abstand von der Wand
(10 cm) beibehält; das
Netzteil liegt unter der Deck-
enrosette verborgen. Inklusive
Befestigungsmaterial.

Der Spiegel wird mit
Schrauben und Spreizdübeln
an der Decke befestigt.

Miroirs

Faro est une famille de miroirs
ronds suspendus à accrocher
au mur.

Les miroirs sont disponibles
pour ces miroirs :
60 ou 90 cm.

L'élément de suspension du
miroir, qui sert également de
lampe à LED, est réalisé en
polycarbonate satiné et ses
extrémités sont en aluminium
anodisé noir.

Le miroir est soutenu par un
câble en acier (h 2,00 m) et
est prédisposé pour rester à
une certaine distance du mur
(10 cm), la source de courant
est dissimulée par le pavillon
de plafond.

Kit de fixation inclus.
Le miroir est fixé au plafond à
l'aide de vis et de chevilles à
expansion.

Espejos

Faro es una familia de espejos
redondos suspendidos que se

NARCISO

Specchi

Specchio componibile rettangolare con cerniere a vista in acciaio inox lucido con altezza cm 60 o cm 80. Suddiviso in tre elementi con bordo a filo lucido e pellicola di sicurezza.

Elemento centrale con misure standard o speciali, elementi laterali bifacciali orientabili con diverse forme e larghezze.

L'elemento centrale è disponibile anche con luci a LED poste dietro allo specchio, sopra e sotto la superficie riflettente.

Opzionale l'interruttore previsto sempre al centro del lato inferiore.

Le fasce luminose sono provviste di diffusore opalino che, oltre a coprire la visibilità diretta dei punti luce, diffonde e distribuisce al meglio la luce. Lo specchio è fissato a parete con viti e tasselli ad espansione.

La versione retroilluminata è disponibile anche con tensione elettrica a 110 V; è sufficiente aggiungere alla fine del codice la lettera U. Il valore degli specchi non subisce variazioni.

Mirrors

Modular rectangular mirror with visible hinges in polished stainless steel, with height 60 (23" 5/8) or 80 cm (31" 1/2). Divided into three elements with polished edges and safety film.

Central element with standard or custom measures; two-sided adjustable lateral elements in different shapes and widths.

The central element is available with LED lights placed behind the mirror, above and below the reflecting surface. Optional switch always positioned at the centre of the bottom edge.

The light strips are equipped with an opal diffuser, which in addition to covering the direct visibility of light sources, diffuses and evenly distributes the light.

The mirror is fixed to the wall by means of screws and wall plugs.

The backlit version is also available in a 110V version; simply add the letter U at the end of the code. The value of the mirrors is not compromised.

Speigel

Rechteckiger, komponierbarer Spiegel mit sichtbaren Scharnieren aus glänzendem Edelstahl von 60 oder 80 cm Höhe. In drei Elemente mit glänzendem Rand und Sicherheitsfolie unterteilt.

Mittleres Element in Standard- oder Spezialmaßen, beidseitig verspiegelte Seitenflügel in verschiedenen Formen und Breiten.

In dem Versionen von 60 oder 80cm Höhe ist das Mittelteil auch mit oben und unten hinter dem Spiegel montierten LED Lichtern lieferbar.

Der stets in der Mitte der Vorderseite vorgesehene Schalter ist ein Opalglas. Die Lichtbänder sind mit einer Abdeckung aus Milchglas versehen, die nicht nur den direkten Blick auf die Lichtquellen verdecken, sondern das Licht auch bestmöglich verteilen. Die Spiegel werden mit Schrauben und Expansionsdübeln an der Wand befestigt.

Die Version mit Hintergrundbeleuchtung ist auch mit einer elektrischen Spannung von 110 V erhältlich; dafür am Ende des Bestellcodes den Buchstaben U hinzufügen. Der Preis der Spiegel variiert nicht.

Miroirs

Miroir modulable rectangulaire avec charnières visibles en acier inox poli avec 60 ou 80 cm de hauteur.

Divisé en trois éléments à chants polis et film de protection anti-éclats.

L'élément central est disponible également avec éclairage LED situé derrière le miroir, dessus et sous la surface réfléchissante. En option l'interrupteur prévu toujours au centre du côté inférieur.

Les faisceaux lumineux sont dotés d'un diffuseur opalin qui, en plus de couvrir la visibilité directe des points de lumière, diffuse et distribue au mieux la lumière. Le miroir est fixé au mur avec des vis et des chevilles expansives.

La version rétroéclairée est également disponible avec une tension électrique à 110 V; il suffit d'ajouter à la fin du code la lettre U. La valeur des miroirs ne subit pas de variations.

Espejos

Espejo componible rectangular con bisagras a vista en acero inoxidable de 60 cm o 80 cm de altura.

Se divide en tres elementos con borde a ras en acabado brillo y película de seguridad.

El elemento central puede suministrarse también con luces LED, instaladas dentro del espejo, por encima y por debajo de la superficie reflectante.

Opcional el interruptor previsto siempre en el centro del lado inferior.

Las bandas luminosas están provistas de difusor opalino que, además de cubrir la visibilidad directa de los puntos luz, difunde y distribuye mejor la luz.

El espejo se fija a la pared con tornillos y tacos de expansión. La versión retroiluminada está disponible también con tensión eléctrica a 110 V; es suficiente agregar al final del código la letra U. El valor de los espejos no sufre variaciones.

Seppia Mirror

design Benedini Associati, 2021

[Back to mirrors...](#)

One shape, two different uses:

Seppia can be positioned both horizontally or vertically.

The rounded corners of this design recall the **mathematical concept of the superellipse**. Halfway between a rectangle and an oval, Seppia's free and ineffable lines avoid harsh geometrical angles: it can be positioned **both horizontally or vertically** according to the needs of the space.

The mirror can be **back-lit** with LED lighting.

Can be oriented vertically and horizontally.

SEPIA

Specchi

Specchio con sagoma superellittica con bordo a filo lucido, con o senza illuminazione a LED. Disponibile per posizionamento in orizzontale o in verticale. Kit di fissaggio compreso. Lo specchio è fissato a parete con viti e tasselli ad espansione.

Mirrors

Mirror with super-elliptical shape with polished edge, with or without LED lighting. Available for horizontal or vertical positioning. Fixing kit included. The mirror is wall mounted by means of screws and wall plugs.

Spiegel

Spiegel mit superelliptischer Form, glänzend geschliffenem Rand, mit oder ohne LED-Beleuchtung. Vertikal und horizontal verwendbar. Inklusive Befestigungsmaterial. Der Spiegel wird mit Schrauben und Expansionsdübeln an der Wand befestigt.

Miroirs

Miroir avec gabarit superelliptique avec bord à chants polis, avec ou sans lumière LED. Disponible pour positionnement en horizontal ou en vertical. Kit de fixation inclus. Les miroirs sont fixés au mur avec des vis et des chevilles expansives.

Espejos

Espejo con forma súper elíptica con borde brillo, con o sin iluminación LED. Disponible para posicionamiento en horizontal o en vertical. Kit de fijación incluido. El espejo se fija a la pared con tornillos y tacos de expansión.

Vitruvio Mirrors

design García Cumini, 2021

[Back to mirrors...](#)

Three sizes:

A circle inscribed in a square.

García Cumini's new collection of mirrors **reinterprets classical style** through a contemporary understanding of proportion and beauty. The LED light surrounds the reflective surface, creating a clean line that **illuminates without casting shadows**.

Vitruvio is available in three sizes: **60, 80 and 120 cm**, they can be freely mix-and-matched, and are perfect for any type of space.

VITRUVIO

Specchi

Specchio quadrato con luce interna a LED che disegna un cerchio inscritto nel perimetro esterno.

Vitruvio è disponibile in tre dimensioni: 60, 80 e 120 cm ed ha il bordo a filo lucido. Kit di fissaggio compreso. Lo specchio è fissato a parete con viti e tasselli ad espansione.

Mirrors

Square mirror with internal LED light that draws a circle inscribed in the external perimeter.

Vitruvio is available in three sizes: 60, 80 and 120 cm with polished edge. Fixing kit included. The mirror is fixed to the wall with screws and expansion plugs.

Spiegel

Quadratischer Spiegel mit leuchtender, in den Umfang eingeschriebener, LED-Beleuchtung. Vitruvio ist in drei Größen lieferbar: 60, 80 und 120cm und hat einen glänzend geschliffenen Rand.

Befestigungsmaterialien inbegriffen. Der Spiegel wird mit Schrauben und Spreizdübeln an der Wand befestigt.

Miroirs

Miroir carré avec lumière LED interne qui dessine un cercle inscrit dans le périmètre externe.

Vitruvio est disponible en trois tailles: 60, 80 et 120 cm et a le bord poli. Kit de fixation inclus. Les miroirs sont fixés au mur avec des vis et des chevilles expansives.

Espejos

Espejo cuadrado con luz LED interna que dibuja un círculo inscrito en el perímetro externo. Vitruvio está disponible en tres dimensiones: 60, 80 y 120 cm y tiene el borde a ras.

Kit de fijación incluido. El espejo se fija a la pared con tornillos y tacos de expansión.

Evo 21 System

design Benedini Associati, 2021

Evo 21 upgrades with
new **40 cm depth.**

What is Evo 21?

A brief description.

Evo 21 is Agape's **entry level modular system** for wall-mounted, monolithic compositions with closed containers and elevated storage capacity.

COMPOSITIONS WITH INDEPENDENT CONTAINERS

FLAT XL
LATO
RIGO

COMPOSITIONS INTEGRATED CONTAINERS

EVO 21

How it works:

Elements and rules of Evo 21.

To design an Evo 21 composition you will need to specify and sum the following different elements:

1. One or more Containers
2. One Countertop
3. Two Side panels
4. One or two Beam Covers
5. One or two washbasins if any

There are some basic rules:

- The composition needs to be wall mounted.
- The composition must be equal or longer than 80 cm.
- The composition must be shorter or equal to 240 cm.
- There must be no gap between the containers.
- Every container should have the same height.
- Every container has to be covered by the countertop.

EVO 21

Introduzione

Evo 21 è il nuovo sistema modulare per composizioni monoblocco a muro con contenitori chiusi ed una elevata capacità di contenimento, disegnato da Benedini Associati.

Caratteristica principale di questo programma è la possibilità di realizzare composizioni con misure specifiche richieste dal cliente.

Il programma è composto da piani in solid surface, in legno o in marmo, da contenitori, da fianchi laterali di finitura, da fascia di copertura delle catene e da alzate.

Introduction

Evo 21 is the new modular system for monobloc wall compositions with closed storage units and a high containment capacity, designed by Benedini Associati.

Main feature of this programme is the possibility to realize compositions with customized dimensions.

The composition is made up of solid surface, wood or marble tops, storage units, finishing side panels, beam band cover and splash-back panels.

Einleitung

Evo 21 ist das neue modulare System für wandmontierte Monoblockschrankkompositionen mit geschlossenen Fächern und einer hohen Aufnahmefähigkeit. Dieses System wurde von Benedini Associati entworfen.

Hauptmerkmal dieses Programmes ist die Möglichkeit, Kompositionen nach Maß zu realisieren.

Das Programm besteht aus solid surface, Holz- oder Marmorplatten, Fächern, Abschlussseitenwänden, einem Kettenabdeckband und Stehbordern.

Introduction

Evo 21 est le nouveau système modulaire pour configurations monobloc murales à caissons fermés et de grande capacité de rangement, conçu par Benedini Associati.

La caractéristique principale de ce programme est la possibilité de réaliser combinaisons avec mesures spécifiques demandées par le client.

La gamme proposée se compose de plans de travail en solid surface, en bois ou en marbre, de caissons porte lavabo, de parevaux latéraux de finition, de bande de cache-chaîne et dossierers.

Introducción

Evo 21 es el nuevo sistema modular para composiciones monobloque de pared con contenedores cerrados y gran capacidad de almacenamiento, diseñado por Benedini Associati.

Este programa se caracteriza especialmente por la posibilidad de realizar composiciones con medidas específicas a petición del cliente.

El programa se compone de encimeras en solid surface, madera o mármol, contenedores, paneles laterales, listón de cobertura de las cadenas y alzados.

EVO 21

Piani/Countertops/Ablagen/Plans/Encimeras

Codifica EVO 21

Per individuare correttamente il piano desiderato, completare il codice inserendo nelle caselle l'opzione possibile seguendo l'ordine indicato (a, b, c, ecc.).

Nell'ordine è necessario indicare la distanza tra il bordo sinistro del piano e il centro del lavabo o dei lavabi.

Codification EVO 21

To order the countertop correctly, complete the order code inserting the desired option in the indicated sequence (a, b, c, etc.).

In the order, it is necessary to indicate the gap between the left edge of the top and the centre of the washbasin(s).

Kodifizierung EVO 21

Zur korrekten Bestellung der Ablage den oben aufgeführten Bestellcode durch Einsetzen der gewünschten Option in der angegebenen Reihenfolge (a,b,c, etc.) vervollständigen.

Bei der Bestellung muss der Abstand zwischen der linken Außenkante der Platte und der Mitte des Waschbeckens bzw. Waschbecken angegeben werden.

Codification EVO 21

Pour déterminer correctement le lavabo à commander, compléter le code en indiquant dans les cases l'option possible en suivant l'ordre indiqué (a,b,c,etc.).

La distance entre le bord gauche du plan et le centre du ou des lavabos doit être indiquée dans la commande.

Codificación EVO 21

Para pedir correctamente la encimera deseada, completar el código insertando en las casillas la opción posible siguiendo el orden que se indica (a, b, c, etc.).

En el pedido debe indicarse la distancia entre el borde izquierdo de la encimera y el centro del lavabo o lavabos.

1. The Countertops. Specifications.

Evo 21 is compatible with all the over-countertop washbasins in the Agape catalogue.

In order to configure a top properly, you will need to specify the following:

1. **Typology of the top**
2. **Length of the top (nominal)**
3. **Finish of the top**
4. **Drilling for washbasin**

1. The Countertops. Typologies and Finishes.

Countertops for Evo 21 come in three thicknesses and three materials: 12 mm in solid surface and wood, 20 mm in marble and 60 mm in wood.

1. Countertops.

Raso integrated washbasin.

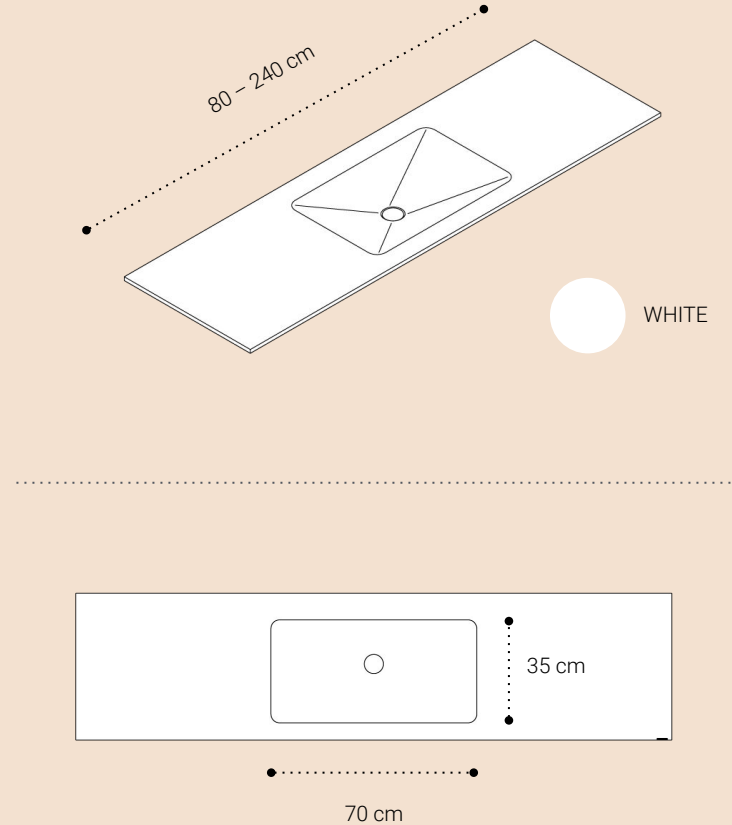

1. Countertops.

Raso integrated washbasin.

With Evo 21, the Raso washbasin also **gets a due revamp**. By updating the manufacturing process from molding (in Exmar) to thermoforming (solid surface) the price have been lowered.

We are very confident that Raso's **simple and timeless geometry** will be a great addition to the Evo 21 lineup. Raso is integrated in the 12 mm acrylic based solid surface countertops.

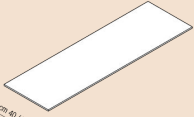

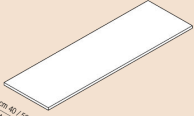

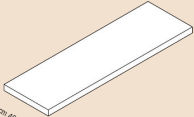

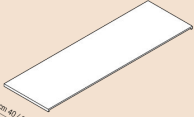

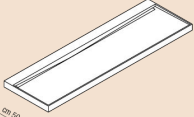

The **countertop version** of the **Raso** washbasin in solid surface and marble is available in the price list.

Evo 21 - A Undici tondo integrato

Posizioni e interessi

Distanza minima dal centro lavabo al bordo del piano (destra o sinistra) e distanza minima tra due invasi.

Il lavabo è compreso di piletta con calotta nella stessa finitura del lavabo.

* misura minima

Nota
La distanza minima dal centro lavabo al bordo del piano (A) deve essere considerata anche quale distanza minima dal bordo dei contenitori posti all'interno della composizione meno lo spessore del fianco (13 mm).

Positions and centre distances

Minimum distance from the centre of the washbasin to the edge of the top (right or left) and minimum distance between two recesses.

The basin includes the waste fitting with plug in a matching finish.

* minimum size

Note
The minimum distance from the centre of the washbasin to the edge of the worktop (A) must be considered also as the minimum distance from the edge of the containers placed in the composition minus the thick-ness of the side panel (13 mm).

Positionen und Achsabstände

Mindestabstand von Waschbeckenmitte zum Rand der Ablage (rechts oder links) und Mindestabstand zwischen zwei Becken.

Ablauf mit Stopfen aus dem Material des Waschbeckens inbegriffen.

* Mindestgröße

Anmerkung
Der Mindestabstand von der Waschbeckenmitte bis zur Kante des Unterschrankes, auf dem das Waschbecken eingesetzt wird, (A) muss abzüglich der Dicke der Seitenwand (13 mm) betrachtet werden.

Position et entraxes

Distance minimum entre le centre du lavabo et le bord du plan (droite ou gauche) et la distance minimale entre deux cavités.

Le lavabo est équipé d'une bonde avec bouchon dans la même finition que le lavabo.

* mesure minimum

Remarque
La distance minimum entre le centre du lavabo et le bord du plan (A) doit aussi être considérée comme la distance minimum du bord des caissons à l'intérieur de la composition moins l'épaisseur du côté (13 mm).

Posiciones y distancias entre ejes

Distancia mínima desde el centro de los lavabos hasta el borde de la encimera (derecho o izquierdo) y distancia mínima entre dos cuencas.

El lavabo comprende la válvula de desagüe con casquete en el mismo acabado del lavabo.

* medida mínima

Nota
La distancia mínima del centro del lavabo al borde de la encimera (A) debe considerarse también como la distancia mínima del borde de los contenedores colocados dentro de la composición menos el espesor del panel lateral (13 mm).

The basin includes the waste fitting with plug in a matching finish.

Ablauf mit Stopfen aus dem Material des Waschbeckens unbegriffen.

Le lavabo est équipé d'une bonde avec bouchon dans la même finition que le lavabo.

El lavabo comprende la válvula de desagüe con casquete en el mismo acabado del lavabo.

* misura minima

* minimum size

* Mindestgröße

* mesure minimum

* medida mínima

Nota

La distanza minima dal centro lavabo al bordo del piano (A) deve essere considerata anche quale distanza minima dal bordo dei contenitori posti all'interno della composizione meno lo spessore del fianco (13 mm).

Nota

The minimum distance from the centre of the washbasin to the edge of the worktop (A) must be considered also as the minimum distance from the edge of the containers placed in the composition minus the thick-ness of the side panel (13 mm).

Anmerkung

Der Mindestabstand von der Waschbeckenmitte bis zur Kante des Unterschrankes, auf dem das Waschbecken eingesetzt wird, (A) muss abzüglich der Dicke der Seitenwand (13 mm) betrachtet werden.

Remarque

La distance minimum entre le centre du lavabo et le bord du plan (A) doit aussi être considérée comme la distance minimum du bord des caissons à l'intérieur de la composition moins l'épaisseur du côté (13 mm).

Nota

La distancia mínima del centro del lavabo al borde de la encimera (A) debe considerarse también como la distancia mínima del borde de los contenedores colocados dentro de la composición menos el espesor del panel lateral (13 mm).

EVO 21

Piani/Countertops/Ablagen/Plans/Encimeras

Evo 21 - Litorale

Posizioni e interessi

Nella versione con uno scarico, questo è sempre decentrato di 130 mm a sinistra rispetto all'asse centrale del piano.

Nella versione con due scarichi, questi sono sempre posizionati a 512 mm dal bordo destro e dal bordo sinistro.

Il piano/lavabo Litorale non necessita di piletta, ma è obbligatorio l'inserimento del sifone .MET0519.

Altezza consigliata per rubinetteria Agape a parete

SEN

Positions and centre distances

In the version with one drain, the latter is always off-centred by 130 mm (5" 1/8) to the left with respect to the central axis of the top.

In the version with two drains, these are always positioned 512 mm (20" 5/32) from the right edge and left edge.

The Litorale countertop/washbasin does not need a waste bit. It is necessary to use waste trap .MET0519.

Recommended height for Agape wall mounted tap

FE22 - LIMON - MEMORY - MEMORY MIX - SQUARE

H 120 mm (4 3/4)

Positionen und Achsabstände

Bei der Variante mit 1 Abfluss ist selber immer um 130 mm nach links gegenüber der Mittelachse der Platte verschoben.

Bei der Variante mit 2 Abflüssen sind diese immer 512 mm vom linken bzw. rechten Rand der Platte positioniert.

Die Litorale Platte/das Waschbecken benötigt keinen Ablauf, aber der Einbau des Siphons .MET0519 ist obligatorisch.

Empfohlene Höhe für Agape-Wandarmatur

Position et entraxes

Dans la version avec une évacuation, cette dernière est toujours excentrée de 130 mm à gauche par rapport à l'axe central du plan.

Dans la version à deux évacuations, ces dernières sont toujours positionnées à 512 mm des bords droit et gauche.

Le plan/lavabo Litorale ne nécessite pas de bonde, mais il est obligatoire d'utiliser le syphon .MET0519.

Hauteur conseillée pour robinetterie Agape au mur

Posiciones y distancias entre ejes

En la versión con un desagüe, éste esta siempre descentrado 130 mm a la izquierda respecto del eje central del plano.

En la versión con dos desagües, éstos están siempre ubicados a 512 mm del borde derecho e izquierdo.

La encimera/lavabo Litorale no necesita válvula de desague, pero es obligatorio utilizar el sifon .MET0519.

2. The Containers.

Components and assembly.

2. The Containers Specifications.

Evo 21 containers are **closed only on three faces**: the bottom and the two sides. The top and the back are always open, therefore every container **needs to be covered by a countertop**. The front is always fully closed by the drawers' front panels.

In order to configure a container properly, you will need to specify, for each container, the following:

1. **Typology of the container**
2. **Width of the container**
3. **Washbasin position if any**
4. **Front panel finish (upper and lower)**

2. The Containers. Typologies.

The pricelist organizes the **containers typology** (a combination of height and drawer configuration). There are **7 types of containers** to choose from.

2. The Containers. Sizes and Modularity.

Evo 21 containers come in three different heights: 30, 40 and 70 cm. The length of the containers is modular, starting from 40 cm, every 20 cm, up to 120 cm. A depth of 40 cm was added.

Every type of container can be made to measure between 40 and 120 cm.

The introduction of 30 cm containers allow for more articulated modularity, higher containment capacity and more nicely proportioned compositions (even more so on shorter configurations).

H 30 CM
L 40 / 120

H 40 CM
L 40 / 120

H 70 CM
L 40 / 120

2. The Containers.

Front panel sizes and finishes.

Wood Reconstituted

Wood Lacquered

Wood Lacquered Open-Pore

There are only two sizes of front panels: **30 and 40 cm**.

The **70 cm** tall containers always need to front panels, **one from each size** (30 on the top, 40 on the bottom).

2. The containers. Composition.

EVO 21

15

Contentori

I contenitori Evo 21 sono disponibili in due profondità, tre altezze e lunghezza su misura. Sono chiusi solo su tre lati: il fondo e le due facce laterali.

Il top e lo schienale sono sempre aperti, quindi ogni contenitore necessita di essere coperto da un piano. Il frontale è sempre completamente chiuso dai cassetti.

Per configurare correttamente un contenitore, sarà necessario specificare, per ogni contenitore, quanto segue:

- Tipologia del contenitore
- Lunghezza del contenitore
- Posizione del lavabo se presente
- Finitura pannelli frontali

La composizione deve essere montata a parete.

La lunghezza della composizione deve essere uguale o superiore a 80 cm e deve essere più corta o uguale a 240 cm.

Non deve esserci spazio tra i contenitori.

I contenitori di una composizione devono avere la stessa altezza.

È sempre obbligatorio inserire i fianchi di finitura, e il copricatena.

Storage units

The Evo 21 storage units are closed only on three sides: the bottom and the two side faces. The top and back are always open, therefore each storage unit needs to be covered by a top. The front is always completely closed by the drawer front panels.

To properly configure a storage unit, you will need to specify, for each storage unit, the following:

- Type of storage unit
- Width of storage unit
- Position of the washbasin if present
- Finish front panels

The composition must be mounted on the wall. The length of the composition must be equal to or greater than 80 cm and it must be shorter or equal to 240 cm.

There must be no gap between the storage units. Every storage unit of a composition should have the same height.

It is always mandatory to insert the finishing sides and the beam cover.

Schränke

Die Evo 21 Möbel sind in zwei Tiefen, drei Höhen und Längen auf Maß lieferbar. Sie sind nur auf drei Seiten geschlossen: Boden und Seiten. Top und Rückseite sind immer offen, deshalb muss jedes Möbel mit einer Platte kombiniert werden. Die Front wird durch die Schubladen geschlossen.

Um einen Unterschrank richtig zu konfigurieren, muss für jeden Schrank folgendes angegeben werden:

- Art des Fachs
- Breite des Fachs
- Position des Waschbeckens, falls vorhanden
- Frontplattenoberfläche

Die Komposition muss an der Wand montiert werden. Die Länge der Komposition muss größer-gleich 80 cm und kleiner-gleich 240 cm sein.

Zwischen den Möbeln/Unterschrank dürfen keine Freiräume vorhanden sind. Die Unterschränke einer Komposition müssen die gleichen Höhen haben.

Die Abschlussseitenplatten und die Kettenabdeckung muss immer vorhanden sein.

Caissons

Les conteneurs Evo 21 sont disponibles en deux profondeurs, trois hauteurs et longueur sur mesure. Ils sont fermés uniquement sur trois côtés: le fond et les deux côtés latéraux.

Le dessus et le dos sont toujours ouverts, donc chaque conteneur doit être recouvert d'un plan. La façade est toujours complètement fermée par les tiroirs.

Pour bien configurer un caisson de rangement ou porte vasque, veuillez préciser, pour chaque unité, les éléments suivants:

- Type de caisson de rangement
- Largeur du conteneur
- Position de la vasque de lavabo si présent
- Finition des panneaux frontaux

La configuration modulaire doit être fixée au mur.

La longueur de cette configuration doit être égale ou supérieure à 80 cm et plus courte ou égale à 240 cm. Il ne doit pas y avoir d'espace entre les caissons de rangement.

Les caissons de rangement configuration doivent avoir la même hauteur.

Il est toujours indispensable d'insérer les côtés de finition et de garde-chaine.

Contenedores

Los contenedores Evo 21 están disponibles en 2 profundidades, 3 alturas y ancho a medida. Sólo están cerrados en tres lados: el fondo y las dos partes laterales.

La parte superior y la trasera siempre están abiertas, por lo que cada mueble debe estar cubierto por una encimera. El frente siempre está completamente cerrado por los cajones.

Para configurar correctamente un mueble, tendrá que especificar lo siguiente para cada contenedor:

- Tipo de contenedor
- Anchura del recipiente
- Posición del lavabo, si está presente
- Acabado de los paneles frontales

La composición debe estar montada en la pared.

La longitud de la composición debe ser igual o superior a 80 cm y debe ser más corta o igual a 240 cm.

No debe haber espacio entre los contenedores. Los contenedores de una composición deben tener la misma altura.

Siempre es obligatorio insertar los paneles laterales y el cubrecadena.

Contentitori

I contenitori, disponibili con profondità di 400 o 500 mm, sono costituiti da casse in particelle di legno CARB2 IDRO rivestite di carta melaminica grigia con effetto laccato opaco, catene di congiunzione in alluminio, cassetti con frontali in legno. Ogni composizione deve essere completata dai fianchi di finitura, dal piano e dal copricatena.

Storage units

The storage units, available with 400 or 500 mm depth, are made up of CARB2 IDRO wooden particle boxes covered with grey melaminic sheets, aluminium connecting chains, drawers with wooden fronts. Each composition must be completed by the finishing sides and the top.

Schränke

Die in 400 oder 500mm Tiefe lieferbaren Möbel haben einen Korpus aus CARB2 IDRO Holzspanplatten, die mit grauem Melaminpapier mit mattem Lackfinish verkleidet sind, Verbindungsleisten aus Aluminium und Schubladen mit Holzfronten. Jede Komposition muss mit seitlichen Abschlussplatten und dem Top vervollständigt werden.

Caissons

Les caisson de rangement, disponibles avec une profondeur de 400 ou 500 mm, sont constitués de caisses en particules de bois CARB2 HYDRO recouvert de papier mélaminique gris avec effet laqué mat, chaînes de liaison en aluminium, tiroirs avec façade en bois. Chaque configuration doit être complétée par les fiancs de finition et depuis le plan.

Contenedores

Los contenedores, disponibles con 400 o 500 mm de profundidad, están formados por cajas de aglomerado de madera CARB2 IDRO recubiertas de lámina melaminica gris con efecto lacado mate, cadenas de conexión en aluminio, cajones con frentes de madera. Cada composición debe ser completada por los paneles laterales y la encimera.

Catena anteriore e posteriore in alluminio anodizzato / Front and rear anodised aluminium beam / Vordere und hintere Kette aus eloxiertem Aluminium / Chaîne avant et arrière en aluminium anodisé / Cadena delantera y trasera de aluminio anodizado

Rivestimento per catena in alluminio verniciato bianco o grigio scuro / Beam cover in white or dark grey painted aluminium / Beschichtung für Kette aus Aluminium, weiß oder dunkelgrau lackiert / Cache-chaîne en aluminium peint blanc ou gris foncé / Revestimiento para cadena de aluminio pintado blanco o gris oscuro

Fianchi di finitura laterali, spessore 12 mm in solid surface, in legno precomposto nelle varie finiture, laccati, laccati a poro aperto oppure in marmo / Lateral finishing sides, 12 mm thick in solid surface, in pre-composite wood in various finishes, lacquered, open-pore lacquered, or in marble / Seitliche Abschlussplatten, Stärke 12 mm aus solid surface, Holzfaserverwerkstoff mit verschiedenen Oberflächen, lackiert, lackiert offenporig oder aus Marmor / Côtés de finition latérale, épaisseur 12 mm en solid surface, en bois précomposé dans diverses finitions, laqués, laqué à pores ouverts ou en marbre / Paneles laterales de 12 mm de espesor, de solid surface, de madera precompuesta en los distintos acabados, lacados, lacados a poro abierto o en mármol

Cassetto con fianchi metallici / Drawer with metal sides / Schublade mit metallischen Seitenplatten / Tiroir avec côtés en métal / Cajón con laterales metálicos

Frontale per cassetto, spessore 19 mm con rivestimento in legno precomposto nelle varie finiture o laccato / Front for drawer, 19 mm thick with coating in pre-composed wood in various finishes or lacquered / Frontpanel für Schubladen, Stärke 19 mm mit Brett-schichtholzbeschichtung in verschiedenen Ausführungen oder lackiert / Façage de tiroir, 19 mm d'épaisseur avec revêtement en bois précomposé dans différentes finitions ou laqué / Frente por cajón de 19 mm de espesor con revestimiento de madera precompuesta en los diferentes acabados o lacado

3. Side panels and countertops. Nominal and real lengths.

Evo 21 countertops **must cover the whole length of the composition**, both the containers and the starting and ending side-panels.

In every documentation we talk about **nominal lengths** when it comes to composition, countertops. The actual length of the composition includes the thickness of both side panels and a tolerance on both sides for a **net increment of 26 mm**. Therefore:

$$L_{\text{real}} = L_{\text{containers}} + 26 \text{ mm}$$

For example, for a 200 cm composition with two 80 cm and one 40 cm containers:

$$800 + 400 + 800 + 26 = 2026 \text{ mm}$$

When it comes to the containers the nominal lengths are the same as actual lengths.

SIDE PANEL

EVO 21

A

Fianchi di finitura

I fianchi sono obbligatori su entrambi i lati della composizione.

Sono disponibili nelle due profondità dei contenitori (400 e 500 mm), in tre altezze (300, 400 e 700 mm) ed un unico spessore: 12 mm.

Disponibili (a coppia) in solid surface bianco, in legno con rivestimento in precomposto in legno con finitura laccata opaca o laccata a poro aperto o in marmo.

I fianchi non sono vincolati al piano ma devono essere uguali su entrambi i lati della composizione.

I fianchi in marmo possono essere forniti anche in Calacatta Vagli e Calacatta viola o con pietre o marmi a richiesta del cliente con costo da preventivare.

Finishing sides

The sides are mandatory on both sides of the composition.

They are available in the two cabinets depth (400 and 500 mm.) in three heights (300, 400 and 700 mm) and a single thickness: 12 mm.

Available (in pairs) in white solid surface, in wood with pre-composite coating in different essences, again in wood with matt lacquered or open-pore lacquered finish or in marble.

The sides are not bound to the top but must be the same on both sides of the composition.

The marble finishing sides can also be supplied in Calacatta Vagli and Calacatta viola marble or with stones or marbles at the customer's request (costs to be estimated).

Seitliche Abschlussplatten

Die Seitenwände sind auf beiden Seiten der Komposition obligatorisch.

Sie sind in den beiden Tiefen der Möbel (400 und 500 mm) in drei Höhen (300, 400 und 700 mm) und einer einzigen Stärke von 12 mm erhältlich.

Erhältlich (paarweise) aus solid surface weiß, aus Holz mit Holzfaserverwerkstoff-Beschichtung mit verschiedenen Holzarten, aus Holz matt lackiert oder lackiert offenporig oder aus Marmor. Die Seiten sind nicht an die Oberplatte gebunden, sondern müssen auf beiden Seiten der Komposition gleich sein.

Die Marmorseitlichen Abschlussplatte können auch aus „Calacatta Vagli“ und aus Stein oder Marmor laut Kundenwunsch ausgeführt werden; in diesem Fall ist ein Kostenvorschlag für den Preis erforderlich.

Côtés de finition

Les côtés de finition sont indispensables sur les deux côtés de la configuration.

Ils sont disponibles dans les deux profondeurs des conteneurs (400 et 500 mm), en trois hauteurs (300, 400 et 700 mm) et une seule épaisseur : 12 mm.

Disponible (paire) en solid surface blanc en bois avec revêtement en précomposé dans différentes essences, toujours en bois avec finition vernis mat ou laqué à pores ouverts ou en marbre. Les côtés ne sont pas liés au plan, mais doivent être identiques sur les deux côtés de la configuration.

Les côtés de finition en marbre peuvent être également fournis en marbre Calacatta Vagli et Calacatta violet ou avec des pierres ou des marbres à la demande du client avec un devis à approuver.

Paneles laterales

Los paneles laterales son obligatorios en ambos lados de la composición.

Están disponibles en las 2 profundidades de los contenedores (400 y 500 mm), en tres alturas (300, 400 and 700 mm) y en un grosor único: 12 mm.

Disponibles (el par) en solid surface blanco, de madera con revestimiento precomuesto en diferentes maderas, siempre de madera con acabado lacado mate o a poro abierto o de mármol. Los paneles laterales no están ligados a la encimera, pero deben ser iguales en ambos lados de la composición.

Los paneles laterales de mármol también pueden suministrarse en Calacatta Vagli y Calacatta violeta o con piedras o mármoles a petición del cliente con un coste a estimar.

H 40 cm (15" 3/4)	332	251			206				1.145				1.259	1.374	AE21F54 <input type="checkbox"/>
H 70 cm (27" 9/16)	480	340			260				1.418				1.560	1.701	AE21F57 <input type="checkbox"/>

4. Beam Covers.

The beam covers run through the **whole length of the composition** and cover all the joints between the containers. For the **30 and 40 cm** tall containers you will need to specify **one cover**, while for the **70 cm** tall containers, you will have to add **two covers**.

The length of the beam cover is equal to the sum of the length of the containers therefore it is also equal to the nominal length of the composition itself :

$$L_{\text{cover}} = L_{\text{containers}} = L_{\text{nominal}}$$

Available in two different colours, white and grey, the covers can give an important contribution to the final configuration of the composition. **On the 70 cm containers they do not need to have the same finish.**

4. Beam covers.

EVO 21

Copicratena

I copicratena percorrono tutta la lunghezza della composizione e coprono tutte le giunzioni tra i contenitori. Per i contenitori alti 30 e 40 cm è necessario specificare un solo copicratena, mentre per i contenitori alti 70 cm ne vanno considerati due.

La lunghezza del copicratena è uguale alla somma della lunghezza dei contenitori per cui è anche uguale alla lunghezza nominale della composizione intera:

L copicratena = L contenitori = L nominale

Il copicratena, realizzato in alluminio, è disponibile in bianco o grigio scuro. Con contenitori da 70 cm non è obbligatorio avere la medesima finitura per i due copicratena.

Beam cover

The beam covers run the entire length of the composition and cover all the junctions between the storage units. For 30 and 40 cm high storage units it is necessary to specify only one beam cover, while for 70 cm high storage units two are necessary.

The length of the beam cover is equal to the sum of the length of the storage units for which it is also equal to the nominal length of the entire composition:

L beam cover = L storage units = L nominal

The beam cover, made of aluminium, is available in white or dark grey. On 70 cm storage units the two beam covers do not need to have the same finish.

Kettenabdeckung

Die Kettenabdeckungen verlaufen über die gesamte Länge der Komposition und decken alle Verbindungen zwischen den Fächern ab. Bei den 30 und 40 cm hohen Fächern muss nur eine Kettenabdeckung angegeben werden, während bei den 70 cm hohen Fächern zwei zu berücksichtigen sind.

Die Länge der Kettenabdeckung entspricht der Summe der Länge der Fächer, d. h. sie entspricht auch der Nennlänge der gesamten Komposition:

L Kettenabdeckung = L Fächer = L Nennlänge

Die Kettenabdeckung aus Aluminium ist in weiß oder dunkelgrau erhältlich. Bei den Fächern mit 70 cm ist die gleiche Oberfläche der beiden Kettenabdeckungen nicht verpflichtend.

Garde-chaîne

Le garde-chaîne traverse toute la longueur de la configuration et recouvre toutes les jonctions entre les récipients. Pour les saisons de 30 et 40 cm de haut, il est nécessaire de préciser un seul garde-chaîne, tandis que pour les versions de 70 cm, deux caches doivent être pris en compte.

La longueur du garde-chaîne est égale à la somme de la longueur des saisons et est également égale à la longueur nominale de l'ensemble de la configuration :

L garde-chaîne = L saisons porte lavabo = L nominal

Le garde-chaîne en aluminium, est disponible en blanc ou gris foncé. Avec des saisons de 70 cm, il n'est pas indispensable d'avoir la même finition pour les deux garde-chaîne.

Cubrecadena

Los cubrecadena recorren toda la longitud de la composición y cubren todas las juntas entre los contenedores. Para los contenedores de 30 y 40 cm de altura, sólo es necesario especificar un cubrecadena, mientras que para los contenedores de 70 cm de altura hay que considerar dos.

La longitud del cubrecadena es igual a la suma de la longitud de los contenedores, por lo que también es igual a la longitud nominal de toda la composición:

L cubrecadena = L contenedores = L nominal

El cubrecadena, realizado de aluminio, está disponible en blanco o gris oscuro. En el caso de los recipientes de 70 cm, no es obligatorio que los dos cubrecadenas tengan el mismo acabado.

5. Splash-back panels.

Splash-back panels in different materials, available in two different heights: **30 cm and 40 cm**.

To be positioned wall mounted and to be rested on the top, in **solid surface, reconstituted wood and marble**.

The **length is nominal** and it is the same of the containers, the splash-back panels real measures have increased by 26 mm.

$$L_{\text{alzata}} = L_{\text{contenitori}} = L_{\text{nominale}}$$

Alzate

Alzate in diversi materiali disponibili in due altezze: 30 e 40 cm, in legno, marmo o solid surface, da posizionare a parete e in appoggio sul bordo posteriore del piano.

Kit di fissaggio non compreso, si consiglia silicone trasparente antimuffa o colla a presa rapida.

Per l'installazione di rubinetti ad incasso è necessario valutare lo spessore dell'alzata.

Le lunghezze indicate sono nominali e sono pari all'ingombro dei contenitori. Le misure reali delle alzate sono aumentate di 26 mm come per i piani.

L = misura nominale, lunghezza reale + 26 mm

Le alzate possono essere fornite anche in marmo Calacatta Vagli e Calacatta viola o con pietre o marmi a richiesta del cliente con costo da preventivare.

Codifica
Le alzate sono individuate dal codice, questo deve essere completato in ogni campo inserendo nelle caselle l'opzione possibile seguendo l'ordine indicato.

Splash-back panels

Splash-backs in different materials available 30 or 40 cm high, in wood, marble or Solid Surface, to be placed against the wall and on the back edge of the countertop.

Fastening kit not supplied. The use of transparent anti-mould sealant or rapid drying glue is recommended.

For the installation of built-in taps it is necessary to evaluate the thickness of the back-splash.

The lengths indicated are nominal and equal to the overall dimensions of the storage units. The actual dimensions of the splash-back have increased by 26 mm as well as for tops.

L = nominal size, real length + 26 mm

The splash-back panels can also be supplied in Calacatta Vagli and Calacatta viola marble or with stones or marbles at the customer's request (costs to be estimated).

Codification
The splash-back panels are identified by the order code, which has to be completed in every field filling in the possible options following the indicated sequence.

a. height of splash-back panel

3. cm 30
4. cm 40

b. type of tap hole

Stehborde

Spritzschutz aus verschiedenen Materialien available 30 und 40 cm hoch, in Holz, Marmor oder solid surface, welche an der Wand zu positionieren ist.

Befestigungskit nicht im Lieferumfang enthalten, wir empfehlen transparentes Anti-Schimmel-Silikon oder Sekundenkleber.

Bei der Installation von Unterputzarmaturen bitten wir Sie, die Stärke des Spritzschutzes zu berücksichtigen.

Bei den angegebenen Längen handelt es sich um Nennmaße, die den Abmessungen der Fächer entsprechen. Die realen Abmessungen der Platten sind um 26 mm verlängert, aufgrund der Stärke.

L = Nennmaß, effektive Länge + 26 mm

Die Stehborde können auch aus Marmor Calacatta Vagli und Calacatta Viola oder aus Stein oder Marmor laut Kundenwunsch ausgeführt werden; in diesem Fall ist ein Kostenvorschlag für den Preis erforderlich.

Kodifizierung
Die Stehborde werden durch den Bestellcode identifiziert, dieser muß in jedem Feld mit der gewünschten Option gemäß der angegebenen Reihenfolge ausgefüllt werden.

a. Höhe der Ablage

Dossierets

Dossierets en plusieurs matériaux disponibles en deux hauteurs: 30 et 40 cm, en bois, marbre ou solid surface, à fixer au mur et en appui sur le bord postérieur du plan.

Kit de fixation non inclus, silicone transparent anti-moississure conseillé ou colle à prise rapide.

Pour l'installation des robinets à encaissement il est nécessaire d'évaluer l'épaisseur du dossieret.

Les longueurs indiquées sont nominales et correspondent aux dimensions des caissons. Les mesures réelles des dossierets sont augmentées de 26 mm comme pour les plan.

L = dimension nominale, longueur réelle + 26 mm

Les dossierets peuvent être également fournis aussi en marbre Calacatta Vagli et Calacatta violet ou avec des pierres ou des marbres à la demande du client avec un devis à approuver.

Codes
Les dossierets sont identifiés par le code ci-dessous, qui doit être complété en indiquant dans les carreaux l'option possible en suivant l'ordre indiqué.

a. hauteur de le dossieret

3. cm 30
4. cm 40

Alzados

Alzados en diferentes materiales disponibles en 2 alturas: 30 y 40cm, en madera, mármol o solid surface, a posicionar a pared o en apoyo sobre el borde posterior de la encimera.

Kit de fijación no incluido, se aconseja silicona transparente antimoho o cola rápida.

Para la instalación de grifería a empotrar es necesario evaluar el espesor del alzado.

Las longitudes indicadas son nominales e iguales a las dimensiones totales de los contenedores. Las medidas reales de los alzados se incrementan de 26 mm como para las encimeras

L = tamaño nominal, longitud real + 26 mm

Los alzados también pueden suministrarse de mármol Calacatta Vagli y Calacatta violeta o con piedras o mármoles a petición del cliente con un coste a estimar.

Codificación
Los alzados se localizan mediante el código, este debe completarse en todos sus campos insertando en las casillas la opción posible.

Ottocento 002 washbasin, waste

Lavabi ad incasso

Lavabo ad incasso rettangolare in Cristalplant® biobased bianco, senza foro per rubinetto, a scarico libero. Utilizza piletta .MET0563 o, con sifone a scomparsa .PLA0456, .MET0418L o .MET0509L.

Non è possibile l'inserimento del lavabo sul piano Flat XL con profondità cm 50 abbinato al contenitore portalavabo Plus.

Non è possibile l'inserimento su piano Flat XL in marmo. Il lavabo è disponibile integrato nel piano Flat XL Ottocento 002 (pag. 16.2.8).

Built-in washbasins

Rectangular built-in washbasin in white Cristalplant® biobased, without tap hole and overflow. Designed for waste .MET0563 or, with concealed waste trap .PLA0456, waste .MET0418L or .MET0509L.

Installing the basin on the Flat XL top with 50 cm depth combined with the Plus washbasin supporting storage unit is not possible. Insertion on the Flat XL top in marble is not possible. The washbasin is available integrated into the Flat XL Ottocento 002 top (pag. 16.2.8).

Einbau-waschbecken

Rechteckiges Einbauwaschbecken aus weißem Cristalplant® biobased, ohne Armaturenloch und ohne Überlauf. Verwendet das Ablaufventil .MET0563 oder, mit Einbausiphon .PLA0456, .MET0418L oder .MET0509L.

Der Einbau des Waschbeckens in die Platte Flat XL von 50 cm Tiefe 50 in Verbindung mit dem Waschtischunterschrank Plus ist nicht möglich. Nicht kompatibel mit der Waschtischplatte Flat XL aus Marmor. Das Waschbecken ist in die Waschtischplatte Flat XL Ottocento 002 (pag. 16.2.8).

Lavabos encastrables

Lavabo encastrable rectangulaire en Cristalplant® biobased blanc, sans trou pour la robinetterie, à écoulement libre. Il requiert une bonde .MET0563 ou, avec siphon à encastrement mural .PLA0456, .MET0418L ou .MET0509L.

Il n'est pas possible de monter le lavabo sur le plan Flat XL avec profondeur 50 cm associé au caisson porte-lavabo Plus. Impossible de l'insérer sur le plan Flat XL en marbre. Le lavabo est disponible intégrée dans le plan Flat XL Ottocento 002 (pag. 16.2.8).

Lavabos empotrados

Lavabo empotrado rectangular en Cristalplant® biobased blanco, sin orificio para grifería, sin rebosadero. Utiliza válvula de desagüe .MET0563 o, con sifón empotrado .PLA0456, .MET0418L o .MET0509L.

No es posible colocar el lavabo en la encimera Flat XL de 50 cm de profundidad combinada con el mueble portalavabo Plus. No es posible la inserción sobre encimera Flat XL en mármol. El lavabo está disponible integrado en la encimera Flat XL Ottocento 002 (pag. 16.2.8).

.MET0563

Piletta di scarico da 1"1/4 per lavabi senza foro per troppo pieno (serraggio da 0 a 60 mm)

Waste 1"1/4 for washbasins without overflow hole (fitting 0 to 60 mm - 2"3/8 thick basin waste holes)

1"1/4 Zoll Ablaufventil für Waschbecken ohne Überlauf (schließt von 0 bis 60 mm Ablauflochstärke)

Bonde d'écoulement de 1"1/4 pour lavabos sans trou pour le trop-plein (serrage de 0 à 60 mm)

Válvula de desagüe de 1"1/4 para lavabos sin rebosadero (ajuste de 0 a 60 mm)

Note

Per barre a misura è necessario rispettare le quote sottoriportate ed inviare ai nostri uffici un disegno con le indicazioni della composizione richiesta.

Note

For custom lines it is necessary to comply with the measures indicated below and send to our offices a drawing with indications concerning the composition required.

Achtung

Für maßgerechte Stangen müssen die unten angegebenen Höhen eingehalten und eine Zeichnung mit den Angaben der gewünschten Kombination an unsere Niederlassung geschickt werden.

Note

Pour les barres sur mesure, il est nécessaire de respecter les valeurs indiquées ci-dessous et de nous faire parvenir un dessin indiquant le choix de la composition.

Nota

Para barras a medida es necesario respetar las medidas abajo indicadas y enviar a nuestras oficinas un dibujo con las indicaciones de la composición requerida.

Struttura

Struttura di sostegno per lavabo e accessori costituita da due barre parallele collegate tra di loro e fissate alla parete. Realizzata in alluminio anodizzato spazzolato nero o verniciata in bianco (RAL9003), grigio chiaro (RAL7044) o con altri colori RAL a richiesta, (con aumento del 15%) ha lunghezza minima cm 120 e massima cm 300.

I fissaggi sono due o tre a seconda della lunghezza. La distanza dei fissaggi dalle estremità della struttura è cm 31,5 (al centro fissaggio), il terzo supporto è sempre al centro della struttura, per cui equidistante dai due fissaggi laterali.

Structure

Support structure for washbasin and accessories consisting of two parallel joined bars, fixed on the wall. Created in black satin-finish anodised aluminium or lacquered in white (RAL9003), light grey (RAL7044) or in other RAL colours on request (with a 15% surcharge), it has a minimum length of 120 cm and a maximum length of 300 cm.

There are two or three supports depending on the length. The distance of the supports from the ends of the structure is 31.5 cm (at the centre of the support). The third support is always at the centre of the structure, therefore equidistant from the two supports on either side.

Struktur

Stützstruktur für Waschbecken und Zubehör bestehend aus zwei parallelen Leisten, die miteinander verbunden und an der Wand befestigt sind. Hergestellt aus schwarzem eloxiertem Aluminium oder lackiert in weiß (RAL9003), hellgrau (RAL7044) oder anderen RAL-Farben auf Anfrage (mit einem Aufpreis von 15%). Die Mindestlänge beträgt 120 cm und die Maximallänge 300 cm. Die Anzahl der Befestigungen variiert je nach Länge zwischen zwei oder drei. Der Abstand der Befestigungen von den Enden der Struktur beträgt 31,5 cm (in der Befestigungsmitte), die dritte Stütze befindet sich immer in der Mitte der Struktur, sodass der Abstand zu den beiden seitlichen Befestigungen gleich ist.

Structure

Structure de support pour lavabo et accessoires qui comprend deux barres parallèles reliées l'une à l'autre et fixées au mur. Fabriquée en aluminium anodisé brossé noir ou peint en blanc (RAL9003), gris clair (RAL7044) ou autres couleurs RAL sur demande (avec une augmentation de 15%), elle a une longueur minimale de 120 cm et une longueur maximale de 300 cm. Les fixations sont deux ou trois selon la longueur. La distance entre les fixations et les extrémités de la structure est 31,5 cm (au centre de la fixation), le troisième support étant toujours au centre de la structure, il est donc à égale distance des deux fixations latérales.

Estructura

Estructura de soporte para lavabo y accesorios constituida por dos barras paralelas unidas entre ellas y fijadas a la pared. Realizada en aluminio anodizado cepillado negro o pintada en blanco (RAL9003), gris claro (RAL7044) o con otros colores RAL bajo petición (con un recargo del 15%), tiene longitud mínima 120 cm y máxima 300 cm. Las fijaciones son dos o tres según la longitud. La distancia de las fijaciones de los extremos de la estructura es 31,5 cm (en el centro de fijación), el tercer soporte es siempre en el centro de la estructura, por tanto equidistante de las dos fijaciones laterales.

RIGO

Vassoio porta oggetti

Vassoio porta oggetti in legno in diverse dimensioni e finiture per accessorizzare la struttura Rigo.

Due vassoio con la stessa profondità e con due larghezze diverse si fissano direttamente e liberamente alla struttura, un terzo vassoio può essere collocato sul piano.

I vassoio sono realizzati in rovere massello con finitura naturale, bruno, scuro o in legno precomposto con finitura teak oppure verniciati a poro aperto in verde pino (RAL6028) o turquoise pastello (RAL6034).

I vassoio sono predisposti dimensionalmente per alloggiare i vari elementi che compongono la serie Puzzle (cap. 12).

Trays

Wooden trays in various sizes and finishes to accessorise the Rigo structure.

Two trays with the same depth and two different widths to be fixed directly and freely to the structure, while a third tray can be placed on the countertop.

The trays are made of solid oak with natural, brown or dark oak finish or in reconstituted wood with finish or open pore painted in green pine (RAL6028) or pastel turquoise (RAL6034). The trays are made to hold the various elements which make up the Puzzle series (sect. 12).

Tablett

Tablets aus Holz in verschiedenen Größen und Ausführungen für die Struktur Rigo.

Zwei Tablett mit der gleichen Tiefe und mit zwei verschiedenen Breiten werden direkt und frei an der Struktur befestigt, ein drittes Tablett kann auf der Waschtischplatte platziert werden.

Die Tablett sind aus massiver Eiche in den Ausführungen natur, braun, dunkel oder aus rekonstruiertem Holz mit Teak-Oberfläche oder offenporig lackiert in Kiefergrün (RAL 6028) oder Pastelltürkis (RAL 6034). Die Abmessungen der Tablett ermöglichen die Aufnahme der verschiedenen Elemente der Serie Puzzle (Kap. 12).

Plateau porte-objets

Plateaux de rangement en bois de différentes tailles et finitions pour accessoriser la structure Rigo.

Deux plateaux de même profondeur et de deux largeurs différentes sont fixés directement et librement à la structure, un troisième plateau peut être placé sur le dessus.

Les plateaux sont en chêne massif avec une finition naturelle, brune ou foncée ou en bois composite avec une finition en teck ou à pores ouverts vernis en vert sapin (RAL 6028) ou turquoise pastel (RAL 6034).

Ces plateaux sont dimensionnés pour accueillir les différents éléments qui composent la série Puzzle (chap. 12).

Bandeia portaobjetos

Bandejas porta objetos en madera de varias dimensiones y acabados para equipar la estructura Rigo.

Dos bandejas con la misma anchuras diferentes se fijan directamente y libremente a la estructura, una tercera bandeja puede ser colocada sobre la encimera.

Las bandejas son realizadas en roble macizo con acabado natural, marrón, oscuro o en madera precompuesta con acabado teca o pintadas con poro abierto en verde pino (RAL6028) o turquesa pastel (RAL6034).

Las bandejas están predisuestas dimensionalmente para alojar los varios elementos que componen la serie Puzzle (cap. 12).

RIGO

Accessori

Specchio tondo bifacciale, un lato ingranditore, con cornice e tubi flessibili cromati da fissare liberamente sulla struttura Rigo.

La base in marmo è disponibile in marmo bianco di Carrara o in verde Alpi.

Fattore di ingrandimento 2, lunghezza tubi 500 mm.

Accessories

Round, double-sided mirror, one side with magnification, with frame and flexible, chromed pipes to fix on the Rigo structure.

The marble base is available in white Carrara marble or verde Alpi.

Magnifying power: 2. Length of tubes: mm 500 (19" 3/4).

Accessoires

Runder, doppelseitiger Spiegel, eine Seite mit Vergrößerung, mit Rahmen und verchromten, flexiblen Armen zur Befestigen auf der Struktur Rigo.

Der Sockel aus Marmor ist in den Ausführungen weißer Carrarmarmo oder verde Alpi lieferbar.

Vergrößerungsfaktor 2, Länge der Arme 500 mm.

Accessoires

Un miroir rond double-face, une côté grossissante, avec structure et tubes flexibles chromés à fixer librement sur la structure Rigo.

La base en marbre est disponible en marbre blanc de Carrara ou marbre vert Alpi.

Facteur de grossissement 2, longueur des tubes 500 mm.

Accesorios

Espejo redondo doble cara, un lado de aumento, con marco y tubos flexibles cromados a fijar libremente sobre la estructura Rigo.

La base en mármol es disponible en mármol blanco de Carrara o verde Alpi.

Factor de aumento 2, longitud de los tubos 500 mm.

Materials.

A wide range of materials and finishings.

CRISTALPLANT® BIOBASED / Cristaplant® is an eco-friendly material coming from vegetal origin resins, combined with inert natural materials characterized by an extreme purity. The surface, with a soft-touch effect, has a similar aspect to the natural stone, which makes it particularly recommended for the bathroom. The material is uniform throughout its thickness and can be easily restored.

Cristalplant® features

Weight reduced by 30%

100% repairable

Reduced CO2

It can be recycled and re-used

CERAMILUX® / Composite material based on natural minerals combined with polyester resins, coated with gelcoat ISO-neopentyl with polyester base. Resistant to temperature changing, scratches and scraping.

SOLID SURFACE / Compact and non-porous material, homogeneously composed by $\frac{1}{3}$ by acrylic resin, and $\frac{2}{3}$ by aluminium hydroxide, a natural mineral which many people are in daily contact, since it constitutes, for example, an important component of toothpaste. Completely non-toxic and recyclable. The surface is homogeneous and silky to the touch, durable and easy to clean up. Any scraping can be easily removed by simply smoothing it.

SILICON RUBBER / Its particular characteristics include: softness, completely non-toxic and pure colour; these qualities make it ideal in case of direct contact with water and skin.

CERAMIC / Mixture of clayish materials, with a compact structure, modeled and then consolidated by baking processes that guarantee the vitrification of the surface, which has a considerable mechanical and electrical resistance.

MARBLE / Crystallized and compact limestone rock. In general it comprehends every limestone rock that could be polished. Thanks to its resistance to compression and high temperatures (up to 650 degrees), marble is suitable for projects in which the technical and aesthetic qualities required of the material are fundamental requirements.

ALUMINIUM / The aluminium is a soft and lightweight metal with a bright silvery color, due to a thin layer of oxidation that forms quickly when the material is exposed to the air. It is extremely resistant to atmospheric corrosion: for this reason it does not require any painting protection, but it can be equally treated with a wide range of coatings, from paintings to coloured anodizing. Aluminium it is not magnetic, non-toxic and not inflammable.

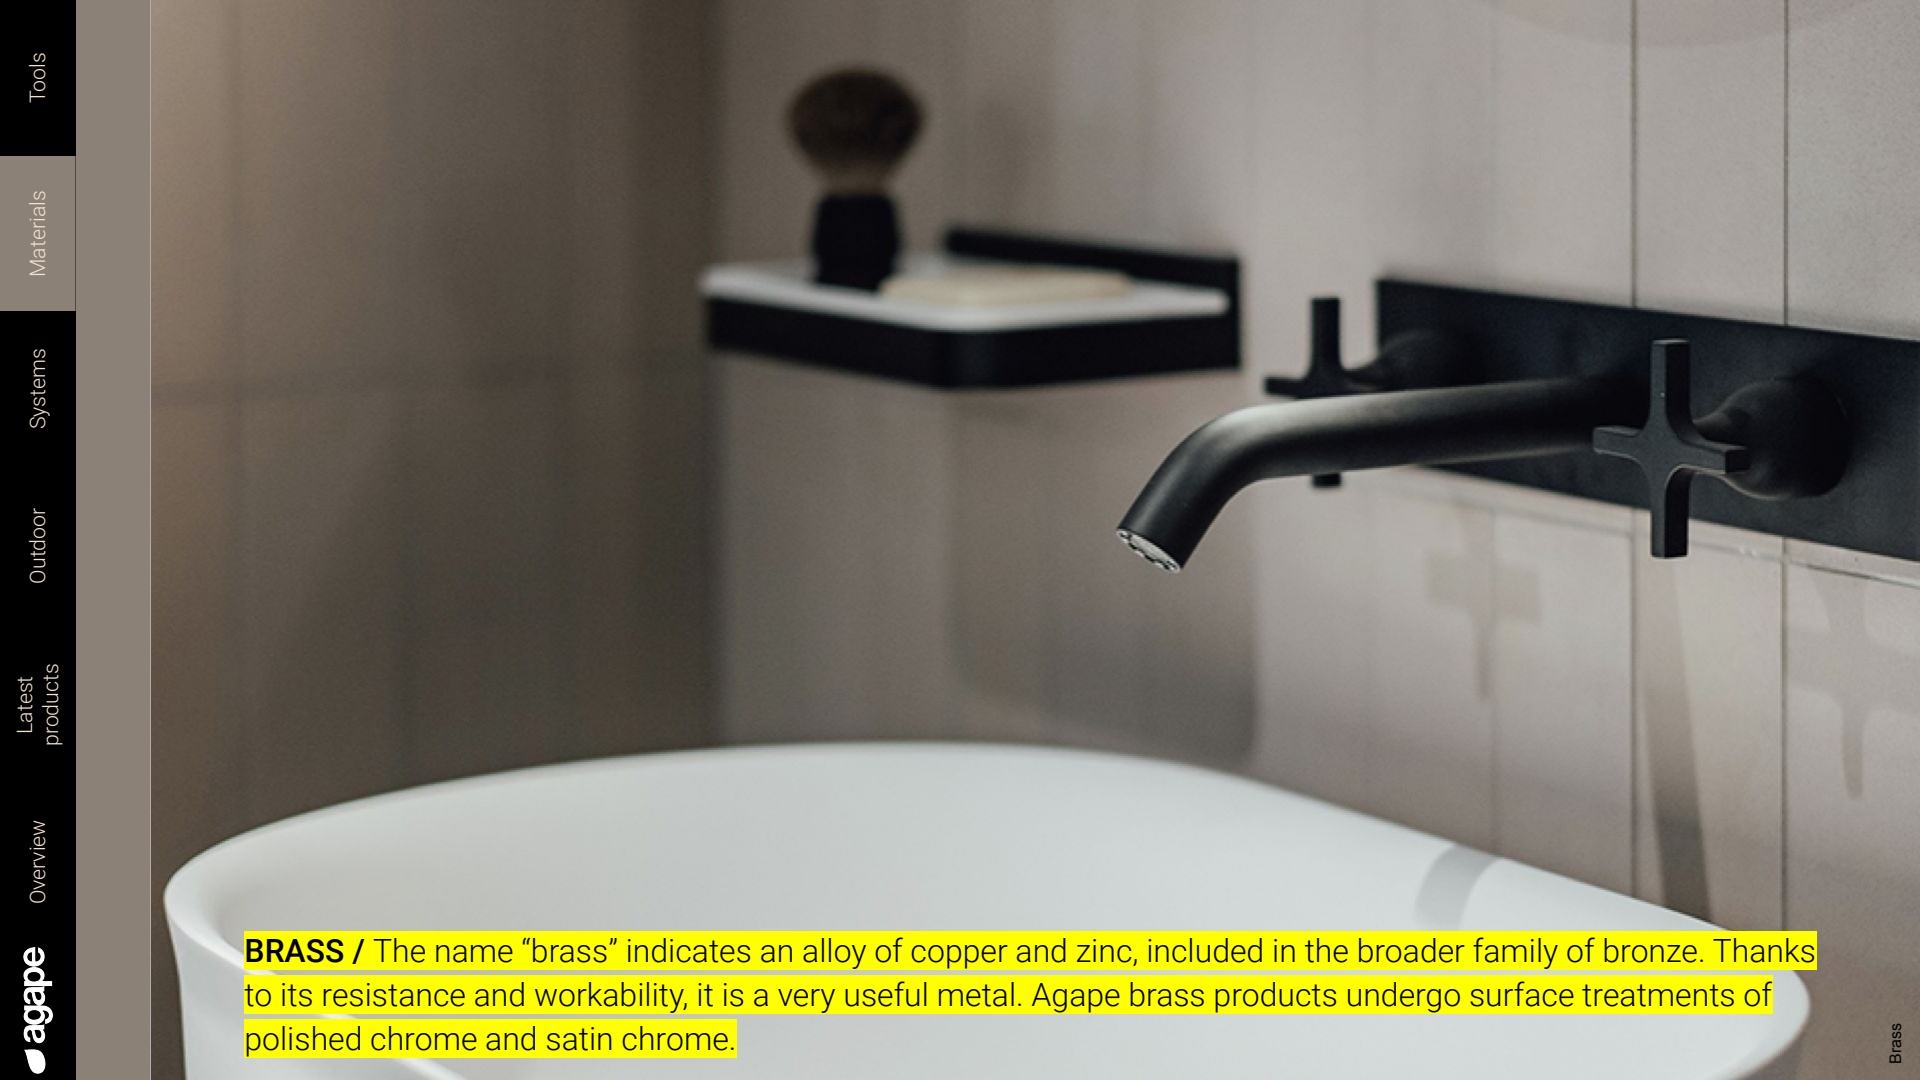

STAINLESS STEEL / Thanks to its smooth and without porosity surface, the stainless steel it's easy to clean and allows you to easily restore the highest level of hygiene. The stainless steel sheets are also resistant to the most common sanitizing products on the market and used in hospitals.

STAINLESS STEEL / The different types of this material change according to their composition and are classified according to the AISI nomenclature. Agape uses AISI 304 and AISI 316L stainless steel, among the most performing steels available on the market, aesthetically identical to each other although different in composition, with surface treatments of polishing or satin finishing.

CEMENTOSKIN® / It's a new material, made by a cement mixture and resin, enriched with carefully selected inerts. This material is resistant to every type of dirt and it is suitable for indoor and outdoor use.

BRASS / The name “brass” indicates an alloy of copper and zinc, included in the broader family of bronze. Thanks to its resistance and workability, it is a very useful metal. Agape brass products undergo surface treatments of polished chrome and satin chrome.

CRYSTAL / Essentially composed by silicates, it is obtained by melting silica sand with oxides and carbonates. Thanks to its perfect transparency, to its inalterability, and the ability to react to light in a changing way, crystal finds its particular application in combination with other materials that make up the Agape production.

A close-up photograph of two wooden handles, likely for a shower or bathtub. The handles are made of light-colored wood with a visible grain. Each handle has a black plastic cap at the end and a black plastic ring around the middle. The background is a neutral, light brown color.

WOOD / The technological heritage of shipbuilding is a fundamental fact in the design of wooden elements for the bathroom. The aging of the material enhances its natural aesthetics qualities, increasing its technological performances. What most fascinates about wood is its life cycle, the changing appearance linked to the passing of the season and time, measured through the slow changing of the surface, grain and color.

IROKO / In Southern Nigeria, where this particularly hard essence is born, Iroko is believed to have supernatural features. Thanks to its excellent properties: water resistance and weathering, it is likely used in the naval sector like Teak wood.

PAINTINGS / Painted products intended for Outdoor use undergo a powder coating cycle and a further step with opaque ceramic clearcoat. It is possible to request customized RAL colors in addition to the ones in the pricelist.

PETIT GRANIT / The Petit Granit, also called The Blue stone of Belgium, doesn't belong to the granite family (even if it has similar mechanical performances), but it's a limestone stone. Originally from Belgium (where the only deposits are found and where it is widely used in architecture), it is a compact and homogeneous stone, with constant color characteristics, which goes from grey to almost black, according to the processing and to the surface treatment. Given its compactness, the Petit Granit is easy to clean, is not subject to infiltration and it's very resistant to dirt and ice.

CRISTALPLANT OUTDOOR / Cristalplant Outdoor, which is used for the outdoor backrest of the Ufo bathtub, has a special mixture developed to slow down its variation of the color due to UV radiations. This mixture has been used also by other Outdoor manufacturers such as B&B Italia and Zanotta.

Washbasins / Lavabi

Bjhon 2

Column washbasin / Lavabo a colonna

A. Mangiarotti

With its sensual curves basin and its truncated conical column, Bjhon 2 becomes an object of strongly sculptural value. Made of marble or stone or with a technologically advanced material: Cristalplant® biobased or in Petit Grant marble for outdoor use. Available with floor or wall drain version.

Con il suo bacino dalle curve sensuali e la sua colonna tronco conica, Bjhon 2 diventa un oggetto di valenza fortemente scultorea. Realizzato in marmo o pietra o con un materiale tecnologicamente avanzato: Cristalplant® biobased oppure in marmo Petit Grant per utilizzo outdoor. Disponibile con versione per scarico a pavimento o a muro.

Memory Mix

Taps / Rubinetti

Brass taps with different finishes featured by the new lever that takes its shape directly from the iconic cross handle of the Memory series. The new single lever is twice as long as a "conventional" Memory handle arm. Its width has been adjusted and slightly enlarged to be ergonomically consistent with the new usage model.

design Benedini Associati, 2021

Rubinetteria in ottone con diverse finiture caratterizzata dalla nuova leva che prende la sua forma direttamente dall'iconica maniglia a croce della serie Memory. La nuova leva singola è lunga il doppio di un braccio dell'impugnatura Memory "convenzionale". La sua larghezza è stata regolata e leggermente allargata per essere ergonomicamente coerente con il nuovo modello di utilizzo.

Heating elements / Elementi riscaldanti

The warmth of a body. The warmth of a hug in the naked intimacy of the bathroom. Probably there is no other space in the domestic landscape where having the right temperature becomes such an important component of the overall experience. Our range of heating elements offers timeless and iconic solutions perfectly at their ease in the most different contexts thanks to their versatility and modularity.

Il calore del corpo. Il calore di un abbraccio nella nuda intimità della sala da bagno. Probabilmente non non ci sono altri spazi nell'universo domestico dove la temperatura sia una componente così fondamentale dell'esperienza. La nostra gamma di elementi riscaldanti offre soluzioni iconiche e senza tempo che sono perfettamente al loro agio nei contesti più diversi, grazie alla loro versatilità e modularità.

Memory

Heated towel rack / Scalda salviette

A self-regulating, heated towel rack made in stainless steel that inherits its timeless delicate lines from the other elements of the Memory collection to which it belongs. Available in polished chrome finish or painted white or black. It can be freely positioned leaning against the wall. The item requires a 230 V AC power outlet and it is not available for the US market.

Scalda salviette autoregolante realizzato in acciaio inox che eredita le sue delicate linee fuori dal tempo dalla collezione Memory a cui appartiene. Disponibile in versione cromata oppure verniciata bianco o nero, l'elemento può essere posizionato liberamente in appoggio alla parete. L'articolo richiede una presa da 230 V AC e non è disponibile per il mercato USA.

Bathubs / Vasche

agapedesign.it/e/4-spoon-m

Spoon M

Freestanding bathtub / Vasca freestanding

Spoon M is one of the latest stations in a more than twenty year long evolution of the Agape bathtub through form, matter and size, tirelessly iterating and refining the underlying concepts over and over again. The new bathtub refines the formal, dimensional and material qualities of the iconic Spoon, on sale since 1998. More sophisticated geometries, thinner edges many a more frugal use of materials, fully exploiting the latest advances in manufacturing technologies. Spoon M is made in Cristalplant® biobased and it is available in white or two-tone versions in light or dark grey.

Spoon M è una delle tappe più recenti di una ricerca che dura da oltre 20 anni e attraverso forma, materia e dimensione in un percorso evolutivo della vasca Agape che, con instancabile meticolosità, procede volentieri per iterazioni successive. La nuova vasca affina le qualità formali, dimensionali e materiali dell'icona Spoon, a listino dal 1998. Geometrie più sofisticate, spessori più sottili si sposano con un uso parsimonioso del materiale approfittando delle potenzialità offerte dai nuovi metodi di produzione. Spoon M è realizzata in Cristalplant® biobased ed è disponibile bianca o bicolor con esterno grigio chiaro o grigio scuro.

Materials Data Sheets.

Each material has its technical sheet with information on care and maintenance.

Material

Characteristics, use and maintenance

Cristalplant®

Characteristics, use and maintenance

Ordinary maintenance

Simply clean Cristalplant® with soapy water or common detergents to remove most of the stains and dirt that can deposits on the surface.

In particular, gel or abrasive detergents are recommended, taking care to rinse the surface well, use it with an abrasive sponge such as "Scotch Brite®" as a sample included; this will keep the original matt finish.

How to prevent damages

The surface has a good resistance to stains in general, but the use of aggressive chemicals, such as acetone, trichlorethylene, strong acids or bases is not recommended.

Some substances such as ink, cosmetics and dyes in prolonged contact with the material, can release colours on the surface, same with cigarettes. Everything can be removed by following the instructions below.

Removal of persistent stains, scratches and burns

Cristalplant® is a homogeneous material throughout all its thickness and can be repaired from surface aggressions, such as scratches, cigarette burns and persistent stains, restoring the surface to its original beauty by following these indications:
For minor damages it is possible to restore the surface by using a "Scotch Brite®" sponge (3M registered trademark) and a common abrasive cleaner. Sand the damaged part, if the damage is still visible, go over by sanding it with very fine sandpaper.

Use: CIF®, VIM® or similar cream or powder detergents that contain micro-granules that abrade the surface. Denatured ethyl alcohol can be used taking care to rinse the surface well.

Do not use: solvents such as acetone or trichlorethylene and other aggressive chemicals such as strong acids (muriatic acid...) and strong bases (caustic soda...). If you want to use industrial cleansers or other whose aggressiveness is unknown, it is better to test the product in a non-visible or small area before applying it to the whole surface.

Removal of severe damage with the maintenance kit (art. AKIT0847CV)

Carefully clean the damaged surface and the surrounding area with a cotton cloth and denatured alcohol. Dust and stains must be removed. Mix the supplied plaster and the catalyst with a stainless steel spatula until the liquid is completely mixed.

N.B. Use the two components completely, if you use wrong doses of catalyst there is a risk of obtaining a yellow color (too much catalyst) or insufficient hardening (too little catalyst).

Apply the plaster on the damaged part and the one immediately surrounding it. Be careful to spread the grout a little at a time inside the damaged part, in order to let the air escape from it. You must obtain a raised part over the damaged section.

Allow the plaster to harden for at least 12 hours at room temperature. To obtain good results, the temperature must be at least 15° C, to speed up the catalysis and obtain faster hardening, a hot air generator (hairdryer) can be used. In this case, after the plaster has hardened, it is sufficient to wait 4-5 hours before removing the excess.

The plaster can be removed with 220 grit sandpaper. If there is a lot of excess plaster applied, it is recommended to use an electric sander with 120 then 220 grit sandpaper to finish the surface.

The surface must be smoothed evenly, also including the surrounding part so as not to notice differences and avoid hollows. After removing the plaster, eliminate the dust and clean with commonly used detergents the Scotch Brite® sponge included in the kit.

The guarantee does not cover damages caused by:

- Wrong or improper maintenance
- Modifications without authorization or improper use (ex. no using the appropriate supports for cutting or fixing between walls)
- Use outside the ambient settings foreseen for the product
- Improper physical or chemical use
- Damage caused by non-compliance with the procedures regarding assembly and installation
- Wrong preparation or maintenance of the place where the product is installed
- Any other improper use how long described, including repair or other interventions maintenance by personnel not authorized by producer
- Extraordinary events
- Limescale deposits caused by the hardness of the water outside the range of 8 and 12 french degrees

General informations about the warranty

Materials Data Sheets.

The materials data sheets are a useful after-sales tool, they help you to **take care** of Agape products in the most correct way.

Each material has its own technical sheet, which contains: **technical explanation** of the material, **daily maintenance**, how to **prevent damages**, removing **persistent stains** or **severe damages**, restoring the **protective coating** or **handful advices** to protect your product in outdoor use.

Characteristics, use and maintenance

Marble and natural stones

Characteristics, use and maintenance

 **Maintenance**

In order to keep the marble surfaces unaltered and protected we recommend to remove as soon as possible any substances that might stain the surface.

Clean and dry after use in order to avoid the formation of limescale and the accumulation of soap rests on the surface. All our products are treated with hydro-oil-repellent protection but nonetheless we always recommend a rapid action to remove liquids or other staining products.

Very important is also the testing of the water hardness which must be between 8 and 12 French degrees, outside these parameters we recommend the installation of a water softener.

 **In addition for outdoor use**

We recommend to follow the instructions for products used in outdoor locations:

- Restore the protective coating every month
- It is necessary to empty the product after use.
- Cover the product with a waterproof protective cloth during cold months (autumn and winter) and protect it from the direct sunlight, to avoid shading on the surfaces.
- It is recommended to protect the product from weathering.

 **Cleaning**

We recommend to use a microfibre cloth and neutral soap (Marseille soap) or [Fila Marble Refresh](#), always dry after cleaning.

 **Restoring the protective coating***

Carrara marble, Pietra Serena and Travertine (neutral treatment)

Use [Fob Xtreme](#) by [Fila](#), this treatment gives the marble protection against stains and breathability without changing its colour and original look. It doesn't create any surface film and is certified for the contact with food.

Grey Carnic marble, Nero Marquina, Verde Alpi, Emperador Dark and Petit Granit (enhancing treatment)

Use [StonePlus](#) by [Fila](#), apply StonePlus on the clean and dry marble with the help of a brush, rub gently during the application with a soft cloth in order to facilitate the absorption of the product and to remove the excess.

To achieve a better enhancement of colour apply more coats of the product, waiting at least 8 hours from one to the other. Once treated with StonePlus, the stone cannot be restored to its original aspect. Before treating the surface test on a small area the product's enhancing effect. On some materials used outdoor we recommend to apply the product annually to keep the enhancing effect at its best. Attention, this treatment does not protect against acid attacks. Do not apply the product in case of rain.

* To restore every 4/6 months

The guarantee does not cover damages caused by:

- Wrong or improper maintenance
- Modifications without authorization or improper use
- Use outside the ambient settings foreseen for the product
- Improper physical or chemical use
- Damage caused by non-compliance with the procedures regarding assembly and installation
- Wrong preparation or maintenance of the place where the product is installed
- Any other improper use how long described, including repair or other interventions maintenance by personnel not authorized by the producer
- Extraordinary events
- Limescale deposits caused by the hardness of the water outside the range of 8 and 12 french degrees
